

— THE 12-WEEK OFF-ICE PROGRAM

POWER & *speed.*

The complete twelve-week off-ice training program for young hockey players. Built on Long-Term Athletic Development principles. Minimal equipment. Programmed by phase. Tested every three weeks. Designed to be the most important twelve weeks of your hockey life so far.

12 WEEKS	4 SESSIONS / WK	48 TOTAL WORKOUTS	4 PHASES
01 FOUNDATION	02 STRENGTH	03 POWER	04 PEAK

COACH DAVID CIBOCH

M.ED. SPORT SCIENCE · NATIONAL TEAM COACH · AGES 12—14

ELITEHOCKEYDRILLS.COM

01 — WELCOME TO THE PROGRAM

YOU'RE ABOUT TO SPEND TWELVE WEEKS *building yourself.*

If you did the free 5-day program — welcome back. You already know how this works. If you didn't — that's okay too. This program teaches you everything from the ground up.

Twelve weeks isn't a long time. It's not enough to become unrecognizable. But it is enough to become measurably better — faster, stronger, more coordinated, more athletic — if you actually do the work. At your age, your body is starting to respond to real strength and power training in ways it couldn't a year ago. We're going to use that.

Four sessions a week. About 35 minutes each. You don't need a gym. You don't need expensive equipment. You don't need to be talented to start. You just need to show up four times a week and do the work the way it's written.

The program is built in four phases. **Foundation. Strength. Power. Peak.** Each phase is three weeks long. At the end of each phase, you test. You write down the numbers. You watch them get better.

There will be days you don't feel like training. Do it anyway. There will be days you feel amazing. Don't go harder than the program says — trust the plan. There will be weeks you don't see progress. The test at the end of the phase will show you the progress was happening the whole time.

Here's the deal: I built this ages 12–14 edition to be the kind of off-ice training I wish I had when I was your age. Move well. Train smart. Have fun with it. The rest takes care of itself.

— FROM THE COACH

*Coach
David*

FOUNDER, ELITE HOCKEY DRILLS

02 — THE METHOD / WHY THIS WORKS

TRAIN YOUNG. TRAIN *smart.*

Between the ages of 12 and 14, you're entering what sport scientists call the **Train-to-Train** window of Long-Term Athletic Development — the years when your body adapts to strength and power training faster than at any other point until your mid-20s.

The neural wiring you build right now — coordination, balance, speed, body awareness — sticks with you forever. The pros wish they had spent more time on this work at your age. That's not a coaching cliché. It's documented in the LTAD literature across every major sport.

This program is not about chasing heavy weights or grinding through brutal workouts. It's about building *the engine*. The strength. The speed. The control. The things that make the difference five years from now, when the kids you train with start playing rep hockey.

Twelve weeks. Four phases. **Movement quality before everything else.**

01

QUALITY OVER QUANTITY

Every rep is a chance to teach your body a pattern it will use for ten years. We move well before we move fast. If a rep is ugly, slow it down or scale it down.

02

PROGRESSION, NOT PUNISHMENT

Each phase builds on the last. Volume and complexity rise on a curve your body can actually adapt to. The third week of each phase eases off — we sharpen before testing, we don't fatigue.

03

MEASURE EVERYTHING

Tests every three weeks. You write down the numbers. The program proves itself in your own handwriting — not in a coach's claim.

“Twelve weeks of patient, well-coached work beats two years of random hard training.”

03 — THE ROADMAP / WHERE WE'RE GOING

THE 12-WEEK *map.*

Four phases, three weeks each. Every phase has a job. Every phase ends with a test that proves the work worked.

THE WEEKLY RHYTHM

DAY A

Lower body — strength, single-leg, glute focus

DAY B

Upper & core — push, pull, anti-rotation

DAY C

Speed & quickness — acceleration, COD, plyo

DAY D

Integration — carries, complexes, full-body

FOUR DAYS. ONE REST DAY MINIMUM IN THE MIDDLE.

01

FOUNDATION

WEEKS 01—03

Movement quality. Bodyweight mastery. The patterns you'll use for every workout after this one.

"Move well first."

02

STRENGTH

WEEKS 04—06

Bands and light dumbbells. Single-leg work. Real load, controlled tempo, hockey-relevant strength.

"Build the frame."

03

POWER

WEEKS 07—09

Plyometrics. Speed. Eccentric work. Turning the strength you built into explosive, hockey-ready power.

"Move fast on purpose."

04

PEAK

WEEKS 10—12

Integration. Complex combinations. The full combine test. Twelve weeks of work, on display.

"Put it all together."

04 — HOW TO USE THIS PROGRAM

FOLLOW THE PLAN.

TRUST THE *process.*

Each week page shows all four of that week's sessions on a single page — Day A, B, C, D. Open the PDF, find your week, do the workout, write down anything to remember.

01

ORDER OF DAYS

Do sessions in order: A → B → C → D. The order spreads stress across your body the right way.

02

SPACING

One rest day in the middle. Most kids do A Mon, B Tue, rest Wed, C Thu, D Fri or Sat.

03

ALWAYS WARM UP

Every session starts with the Universal Warm-Up (page 7). Five minutes. Non-negotiable.

04

TEMPO IS PART OF THE REP

3-1-1-0 means 3s down, 1s pause, 1s up, 0s rest. The tempo IS the work — don't speed through.

05

REST PROPERLY

Rest exists for a reason. On speed days, rest is FULL — speed isn't about being tired.

06

TEST WEEK = TEST WEEK

At the end of each phase, you test. Record the numbers. The numbers tell you what's working.

HOW EACH EXERCISE READS

01 GOBLET SQUAT

3 × 8

REST 60S

THE LIFT

SETS × REPS

REST BETWEEN SETS

05 — WHAT YOU'LL NEED

THE *kit.*

Three pieces of equipment. About \$30–50 total. You'll use these for the entire twelve weeks and every program you do after. Buy once, use forever.

ITEM 01

RESISTANCE BAND LOOP

LIGHT TO MEDIUM · MINI-BAND STYLE

A simple loop band — the kind that goes around your knees or ankles. Used for glute activation, lateral work, hip strength, and band rows. One band is enough for the whole program.

“Get the fabric kind if you can — it doesn't roll up or pinch the skin.”

ITEM 02

LIGHT DUMBBELLS

PAIR · 3–6 KG EACH (5–12 LBS)

A pair of light-to-moderate dumbbells. We're not chasing heavy weights — these are for movement quality and adding meaningful load to patterns. Start light. If you only have one pair, go on the lighter end and progress with reps and tempo rather than load.

“If you only have one weight, go lighter — never heavier. Quality first.”

ITEM 03

JUMP ROPE

ANY KIND · SIZED TO YOUR HEIGHT

A basic jump rope. Used for conditioning, calf strength, ankle stiffness, and rhythm. Stand on the middle of the rope — the handles should reach your armpits. That's the right length.

“A speed rope is great. A \$5 plastic rope works fine too.”

ITEM 04

A LITTLE SPACE

3M × 3M · FLOOR OR GRASS

A clear space about the size of a small bedroom — three meters by three meters. Hardwood, tile, or short grass all work. For Day C (speed), a slightly bigger open area helps but isn't required.

“Outside is a bonus on speed days — fresh air helps.”

OPTIONAL A box or sturdy bench knee-height or lower (for step-ups from Phase 2 onward). A small towel for cool-downs. A water bottle. A notebook to write down your test scores. A light medicine ball or weighted bag for rotational work later in the program.

06 — BEFORE EVERY SESSION

THE *warm-up.*

Five minutes. Four movements. Every single session of the next twelve weeks starts here. The warm-up wakes your nervous system, prepares your joints, and turns on the muscles you're about to ask to work hard. Skip it once, you'll get away with it. Skip it often, you'll get hurt.

01 SPIDER LUNGE WITH ROTATION

2 ROUNDS × 4 EACH SIDE

“Open the hip. Open the chest.”

Push-up position. Step your right foot up beside your right hand. Reach the right arm up to the ceiling and follow it with your eyes. Place the hand back down, step back, switch sides. Slow, controlled, big range.

OPENS HIPS, T-SPINE, SHOULDERS — THE THREE PLACES HOCKEY TIGHTENS YOU UP.

02 INCHWORM TO PUSH-UP

2 ROUNDS × 4 REPS

“Whole body, every rep.”

Stand tall. Bend forward and walk your hands out into a push-up position. Do one controlled push-up (knees down is okay). Walk your hands back to your feet. Stand up. Repeat.

ACTIVATES SHOULDERS, CORE, HAMSTRINGS — YOUR WHOLE POSTERIOR CHAIN WARMS UP AT ONCE.

03 LATERAL SQUAT SHIFT

2 ROUNDS × 5 EACH SIDE

“Sink into one hip at a time.”

Stand wide, feet pointing forward. Shift your weight over your right leg, bending the right knee and keeping the left leg straight. Sink as deep as you can. Pause. Shift to the other side without standing up.

OPENS HIPS AND GROIN. BUILDS THE LATERAL MOBILITY SKATING DEMANDS.

04 A-SKIP IN PLACE

2 ROUNDS × 20 SECONDS

“Tall and bouncy. Light feet.”

Skip in place. Drive the front knee high. Pump the opposite arm. Land soft on the ball of your foot. Stay tall through the chest. This is not iqqinq — it's bouncy and athletic.

07 — AFTER EVERY SESSION

THE cool-down.

Three minutes. Three movements. The cool-down is how you teach your body to switch off after training. Skipping the cool-down won't ruin a workout — but doing it consistently makes everything else work better. Recovery starts the moment training ends.

01 SLOW WALK WITH NOSE BREATHING

60 SECONDS

“In through the nose. Out through the nose.”

Walk slowly. Breathe in and out through your nose only — no mouth breathing. Long, slow breaths. This tells your nervous system that the hard part is over.

SHIFTS YOU FROM TRAINING MODE TO RECOVERY MODE. HEART RATE DROPS. BODY STARTS REPAIRING.

02 CHILD'S POSE WITH BREATH

60 SECONDS

“Long exhales. Drop the shoulders.”

Knees apart, big toes touching. Sit back on your heels. Arms long in front of you, forehead on the floor. Breathe in for 4 seconds. Breathe out for 6 seconds. Repeat for a full minute.

RELEASES LOWER BACK, SHOULDERS, AND THE BREATH YOU'VE BEEN HOLDING WITHOUT REALIZING IT.

03 LEGS UP THE WALL (OR SHIN PULL)

60 SECONDS

“Heavy legs. Quiet mind.”

Lie on your back. Either put your legs straight up against a wall, or pull your shins gently to your chest with your arms. Breathe. Notice how your body feels. This is where the work locks in.

RESTORES CIRCULATION. CALMS THE NERVOUS SYSTEM. BEGINS THE RECOVERY PROCESS BEFORE YOU EVEN STAND UP.

AGES 12—14 NOTE

PRE-PROGRAM SCREEN. Before Week 1, check: can you hold a clean bodyweight squat at full depth? A 30-second plank in a straight line? A push-up to the floor? If any answer is no, spend an extra week in Phase 1 before progressing. If you're in a growth spurt and your knees, heels, or back ache regularly, halve the plyometric volume and tell a coach or parent.

08 — BEFORE YOU START / DAY ZERO

00 THE BASELINE

test.

Before Week 1, Day A — you test. This is your starting line. Six tests, written down, signed and dated. You will retest at the end of every phase and the numbers will change. Twelve weeks from now, you'll come back to this page and look at how far you've come. Be honest. Be precise. The point isn't to be impressive — the point is to be real.

- 01

BROAD JUMP — MAX

Three attempts. Best counts. Standing start. Measure heel-to-line on landing.
- 02

30-SEC SHUTTLE

Two markers 20m apart. 30 seconds of continuous touches. Count every line touch.
- 03

PUSH-UPS / 60 SEC

Max quality push-ups in 60 seconds (knees down version is allowed — note which one).
- 04

PLANK HOLD — MAX

Forearm plank. Straight line head to heels. Time stops on form break.
- 05

SL BALANCE — EYES CLOSED

One foot, eyes closed, hands on hips. Test both legs. Time stops when foot lands.

FOCUS

MOVEMENT QUALITY

EQUIPMENT

BODYWEIGHT + BAND

FOUNDATION.

*“Phase 1 is the most important phase of the program — even though it might feel like the least intense. **Move well first.**”*

For three weeks, we're going to drill the five fundamental movement patterns: squat, hinge, lunge, push, and pull. We'll teach your body what a good rep feels like, and your brain what a clean movement looks like. We're going to do this with bodyweight and a single resistance band — that's it.

By the end of Week 3, your squat will be deeper. Your push-up will be cleaner. Your single-leg balance will be steadier. These are the foundations every harder thing in Phases 2, 3, and 4 will be built on.

— PHASE FOCUS

Movement quality over load. Slow tempos. Pause reps. Clean technique on every single rep. If a rep is ugly, drop the difficulty and reset.

01

— FIRST WEEK. SET THE PATTERN.

WEEK 01
FOUNDATION

01 / 12

Movement learning week. Every rep is a teaching rep. Don't worry about being tired — worry about being clean.

FOCUS

STRENGTH UNDER CONTROL

EQUIPMENT

LIGHT DBS, BAND, JUMP ROPE

STRENGTH.

*“Now we add load. Carefully. **Build the frame.**”*

You've spent three weeks teaching your body the patterns. Now we add weight to them. The dumbbells stay light. The bands stay light. This phase isn't about how much you can lift — it's about how cleanly you can move under load. Goblet squats. Single-leg RDLs. Band rows. Pallof presses. The lifts of every great hockey program.

Two additions you'll see here that aren't in most off-ice programs: the Copenhagen plank (short version) for adductor strength — the single most undertrained area for hockey-specific durability. And rotational med ball throws for shot power.

— PHASE FOCUS

If your form starts to break, drop the weight. The strongest hockey players you've ever seen got there by being patient with this phase first.

04

— INTRODUCING THE LOAD.

WEEK 04
STRENGTH

04 / 12

First week with light dumbbells and the band. Form before weight, always. If a rep is ugly, drop the load.

DAY A

LOWER STRENGTH

- 01 **GOBLET SQUAT (LIGHT DB)**
tempo 3-1-1-0, chest tall
3 × 8
REST 60S
- 02 **DB RDL**
hips back, soft knees
3 × 8
REST 60S
- 03 **WALKING LUNGE**
long stride, knee aligned
2 × 8 BOTH SIDES
REST 60S
- 04 **BAND GLUTE BRIDGE**
band above knees, push out
3 × 10
REST 60S
- 05 **COPENHAGEN PLANK (SHORT)**
top knee on bench, hips up
2 × 10S BOTH SIDES
REST 60S

~32 MIN
WARM-UP + COOL-DOWN

DAY B

UPPER STRENGTH

- 01 **DB FLOOR PRESS**
elbows 45°, slow lower
3 × 6
REST 60S
- 02 **BAND ROW**
squeeze blades, slow return
3 × 10
REST 60S
- 03 **DB PUSH-UP TO ROW**
hips stable, no swing
2 × 4 BOTH SIDES
REST 60S
- 04 **PALLOF PRESS**
resist the rotation
2 × 8 BOTH SIDES
REST 60S
- 05 **DB SUITCASE CARRY**
one DB, don't lean
3 × 20M
REST 60S

~32 MIN
STRICT FORM ON EVERY REP

DAY C

SPEED & PLYO

- 01 **BAND-RESISTED START**
drive low, push the ground
5 × 5M
REST 90S
- 02 **LATERAL BOUND — STICK**
stick the landing 2 sec
3 × 4 BOTH SIDES
REST 90S
- 03 **A-SKIP + MARCH COMBO**
10m march, 10m skip
3 × 15M
REST 90S
- 04 **BOX STEP-UP (DBS)**
drive through the heel
3 × 6 BOTH SIDES
REST 90S
- 05 **JUMP ROPE — INTERVALS**
30s on, 30s off
3 × 30S
REST 90S

~32 MIN
SPEED OVER FATIGUE

DAY D

INTEGRATION

- 01 **FARMER + SUITCASE COMPLEX**
20m each, alternating
3 ROUNDS
REST 45S
- 02 **BEAR CRAWL VARIATIONS**
forward / lateral / reverse
2 × 5M BOTH SIDES
REST 45S
- 03 **SL DB RDL**
stick the bottom, one DB
2 × 6 BOTH SIDES
REST 45S
- 04 **ROTATIONAL MED BALL TOSS**
hips lead, finish facing target
3 × 4 BOTH SIDES
REST 45S
- 05 **FREE PLAY / 1V1 GAME**
compete, have fun

T2 — END OF PHASE 02 / STRENGTH

PHASE TEST

number two.

Halfway point. You're a different athlete than the kid who started six weeks ago. Same six tests as before. Compare against Phase 01. Expect big gains on plank, push-ups, and squat hold. Broad jump and shuttle improve from here on out.

- 01

BROAD JUMP — MAX

3 attempts. Best counts. Goal: beat Phase 01 by 2–5 cm.
- 02

30-SEC SHUTTLE

Same protocol as baseline. Touch every line.
- 03

PUSH-UPS / 60 SEC

Same version as baseline. Quality reps only.
- 04

PLANK HOLD — MAX

Forearm plank. Strict form. Time stops on break.
- 05

SL BALANCE — EYES CLOSED

Both legs. Hands on hips, eyes closed.

— PHASE ZERO THREE 03

03

WEEKS

07–09 / 12 SESSIONS

FOCUS

EXPLOSIVE POWER

EQUIPMENT

LIGHT DBS, BAND, JUMP ROPE

POWER.

*“Strength becomes speed. Now we move fast on purpose. **Move fast on purpose.**”*

You built the engine. Now we tune it. Phase 3 is where strength turns into the explosive power hockey actually demands.

Jump squats. Plyometric push-ups. Lateral bounds. Skater hops. The exercises change but the rule stays the same: every single rep is intentional. Plyometrics done well are gold. Plyometrics done sloppy will hurt you.

— PHASE FOCUS

Two prerequisites we enforce here: plyo push-ups require 10 strict toe push-ups first. Clap push-ups (Phase 4) require 8 strict toe push-ups first. If you're not there yet, that's fine — keep doing standard push-ups until you are. Full rest between explosive sets.

07

— PLYO INTRODUCTION.

WEEK 07

POWER

07 / 12

Low volume, high intent. Every jump is a max-effort jump. Every sprint is full speed. Full rest between.

DAY A

LOWER POWER

- 01 **JUMP SQUAT**
soft land, reset every rep
3 × 5
REST 90S
- 02 **BULGARIAN SPLIT SQUAT (BW OR DB)**
rear foot elevated, control
3 × 6 BOTH SIDES
REST 90S
- 03 **BROAD JUMP**
max distance, stick landing
5 REPS
REST 90S
- 04 **SL RDL (BW OR LIGHT DB)**
6 each, balance focus
2 × 6 BOTH SIDES
REST 90S
- 05 **DEAD BUG WITH DB**
DB held above chest
2 × 8 BOTH SIDES
REST 90S

~32 MIN
WARM-UP + COOL-DOWN

DAY B

UPPER POWER

- 01 **PLYO PUSH-UP (KNEES)***
*must hit 10 strict toe push-ups first
3 × 4
REST 60S
- 02 **BAND PULL-APART SPEED**
fast pull, slow return
3 × 10
REST 60S
- 03 **HALF-KNEELING DB PRESS**
ribs down, slow press
3 × 5 BOTH SIDES
REST 60S
- 04 **HOLLOW ROCK**
small range, controlled
3 × 8
REST 60S
- 05 **TALL PLANK DB DRAG**
hips don't move, only the DB
2 × 4 BOTH SIDES
REST 60S

~32 MIN
STRICT FORM ON EVERY REP

DAY C

MAX SPEED

- 01 **FALLING START SPRINT**
fall forward, catch with sprint
6 × 10M
REST 120S
- 02 **LATERAL SKATER BOUND**
distance + stick
3 × 4 BOTH SIDES
REST 120S
- 03 **CROSSOVER STEP**
snap the hips
3 × 4 BOTH SIDES
REST 120S
- 04 **POGO HOPS**
stiff ankles, quick bounce
3 × 12
REST 120S
- 05 **REACTIVE MIRROR SPRINT**
react, don't anticipate
4 × 10S
REST 120S

~32 MIN
SPEED OVER FATIGUE

DAY D

HOCKEY INTEGRATION

- 01 **SKATER HOP COMPLEX**
3 hops, stick the last
3 ROUNDS
REST 60S
- 02 **DB GOBLET LATERAL LUNGE**
sit into the hip
2 × 6 BOTH SIDES
REST 60S
- 03 **ROTATIONAL MED BALL SIDE TOSS**
hips lead, finish facing target
3 × 4 BOTH SIDES
REST 60S
- 04 **SL BOX STEP-DOWN**
touch heel, slow control
2 × 5 BOTH SIDES
REST 60S
- 05 **BATTLE GAME / 1V1**
small space, compete
10 MIN

~32 MIN
HAVE FUN ON DAY D

08

— PEAK VOLUME OF THE PHASE.

WEEK 08

POWER

08 / 12

Same exercises. More volume. Don't sacrifice quality for quantity. Plyos still go max effort or not at all.

DAY A

LOWER POWER

- 01 **JUMP SQUAT**
soft land, reset every rep
3 × 6
REST 90S
- 02 **BULGARIAN SPLIT SQUAT (BW OR DB)**
rear foot elevated, control
3 × 8 BOTH SIDES
REST 90S
- 03 **BROAD JUMP**
max distance, stick landing
6 REPS
REST 90S
- 04 **SL RDL (BW OR LIGHT DB)**
6 each, balance focus
2 × 8 BOTH SIDES
REST 90S
- 05 **DEAD BUG WITH DB**
DB held above chest
3 × 8 BOTH SIDES
REST 90S

~35 MIN
WARM-UP + COOL-DOWN

DAY B

UPPER POWER

- 01 **PLYO PUSH-UP (KNEES)***
*must hit 10 strict toe push-ups first
3 × 5
REST 60S
- 02 **BAND PULL-APART SPEED**
fast pull, slow return
3 × 12
REST 60S
- 03 **HALF-KNEELING DB PRESS**
ribs down, slow press
3 × 6 BOTH SIDES
REST 60S
- 04 **HOLLOW ROCK**
small range, controlled
3 × 10
REST 60S
- 05 **TALL PLANK DB DRAG**
hips don't move, only the DB
2 × 5 BOTH SIDES
REST 60S

~35 MIN
STRICT FORM ON EVERY REP

DAY C

MAX SPEED

- 01 **FALLING START SPRINT**
fall forward, catch with sprint
6 × 15M
REST 120S
- 02 **LATERAL SKATER BOUND**
distance + stick
3 × 5 BOTH SIDES
REST 120S
- 03 **CROSSOVER STEP**
snap the hips
3 × 5 BOTH SIDES
REST 120S
- 04 **POGO HOPS**
stiff ankles, quick bounce
3 × 15
REST 120S
- 05 **REACTIVE MIRROR SPRINT**

04

WEEKS

10–12 / 12 SESSIONS

FOCUS

INTEGRATION + COMBINE

EQUIPMENT

FULL KIT

PEAK.

“Twelve weeks of work meets the test. This is what we trained for. Put it all together.”

Phase 4 is where everything you learned over the last nine weeks comes together. Complex movements. Combinations. Real hockey-specific integration.

The exercises in this phase are harder — but you can handle them now because you've earned them. Clap push-ups (only if you've earned the prerequisite). Bulgarian split squats with dumbbells. Multi-directional bounding. This is the level of training high school hockey players are doing.

— PHASE FOCUS

Week 12 is a deload. Lighter on purpose. The combine is at the end of that week — and you want to arrive fresh, not tired. Twelve weeks of work shouldn't end exhausted. It should end with you sharp.

10

— INTEGRATION BEGINS.

WEEK 10

PEAK

10 / 12

Complex movements introduced. Combinations of patterns you've trained for nine weeks. Quality first, always.

FINAL — THE COMBINE / DAY 84

THE combine.

Twelve weeks of work. Forty-eight sessions. Three phase tests. Now we do the real one. Same six tests as Day Zero. Full warm-up twice. Full rest between every test. Give every test your maximum. Then we compare — across the entire twelve weeks. This is the proof.

01 BROAD JUMP — MAX
3 attempts. Best counts. Three attempts, best counts. Measure heel-to-line.

02 30-SEC SHUTTLE
Same protocol as baseline. Touch every line.

03 PUSH-UPS / 60 SEC
Same version as baseline. Quality reps only.

04 PLANK HOLD — MAX
Forearm plank. Strict form. Time stops on break.

05 SL BALANCE — EYES CLOSED
Both legs. Hands on hips, eyes closed.

FINAL COMBINE			WEEK 12 — FINAL RESULTS
TEST	RESULT	NOTES	CHANGE
Broad Jump	___ cm	___ cm	+ __
Shuttle Touches	___	___	+ __
Push-Ups (60s)	___	___	+ __
Plank Hold	___	___	+ __
Balance L / R	___ / ___	___ / ___	+ __

PRE VS POST / THE PROOF

YOU VS you.

Day Zero vs Week 12. The same kid. Twelve weeks apart. This is what showing up four times a week, for twelve weeks, does. Fill it in. Take a picture. Send it to whoever helped you stick with it.

PRE VS POST — THE 12-WEEK SCORECARD				DAY ZERO → WEEK 12
TEST	DAY ZERO	WEEK 12	CHANGE	% GAIN
Broad Jump	___ cm	___ cm	+ ___	+ ___%
Shuttle Touches	___	___	+ ___	+ ___%
Push-Ups (60s)	___	___	+ ___	+ ___%
Plank Hold	___	___	+ ___	+ ___%
Balance L / R	___ / ___	___ / ___	+ ___	+ ___%

— WHAT THIS MEANS

A 10% gain in broad jump is significant. A 25% gain in push-ups is huge. Whatever your numbers, they're yours — earned with four sessions a week for twelve weeks. **You did this. Nobody did it for you.** Now stack another twelve weeks on top.

*“The kids who keep their numbers in a notebook and show up four times a week for twelve weeks **are the kids who become real hockey players.**”*

09 — RECOVERY / THE OTHER HALF OF TRAINING

YOU GROW WHEN YOU *recover.*

Training is the stress. Recovery is where the growth happens. Three pillars matter more than anything else: **sleep, fuel, hydration**. Get those three right and the program works even better. Get one of them wrong and the program gets harder than it has to be.

SLEEP

9–11

HOURS / NIGHT

At your age, sleep is when your body builds the muscle, neural connections, and bone density that training stimulated during the day. Less sleep = less benefit from training.

- + Same bedtime every night, even weekends
- + No screens for 30 minutes before bed
- + Cool room, dark room, quiet room
- + Sunlight in your eyes within an hour of waking

FUEL

3+1

MEALS + POST-TRAIN
SNACK

Three real meals a day plus a snack within 60 minutes of finishing a session. The post-training snack is where recovery starts — your body is most ready to use what you eat then.

- + Protein at every meal (eggs, chicken, beef, dairy)
- + Carbs around training (rice, pasta, bread, fruit)
- + Vegetables at lunch and dinner
- + Cut the soda, juice, and energy drinks

WATER

2L+

PER DAY, MORE IF HOT

Dehydration drops performance fast — even a 2% drop in hydration drops jump height, sprint speed, and reaction time. Drink before you're thirsty.

- + 500ml of water first thing in the morning
- + Sip water during every training session
- + Pee should be pale yellow, not dark
- + Add electrolytes if training in heat

10 — NUTRITION / THE PLATE METHOD

EAT TO *train.* EAT TO GROW.

You don't need a fancy diet. You need real food, three times a day, in roughly the right amounts. The Plate Method works for every meal of the next twelve weeks — and the next twelve years.

¼ PLATE

PRO

PROTEIN · EVERY MEAL

A palm-sized portion of protein at every meal. Protein is what your body uses to build muscle and recover from training. Skip it and recovery slows down a lot.

¼ PLATE

CARB

ENERGY · TRAIN + GROW

A fist-sized portion of carbs at every meal. Carbs are your fuel — your brain and muscles run on them. Kids who cut carbs train tired and recover slow.

½ PLATE

VEG

COLOR · EVERY MEAL

Half your plate should be vegetables — preferably multiple colors. They give you the vitamins, minerals, and fiber your body needs to actually use the protein and carbs you eat.

— THE POST-TRAINING SNACK

Within 60 minutes of finishing any session: protein + carb. Greek yogurt with fruit. A glass of chocolate milk. A bowl of cereal with milk. A turkey sandwich. Nothing fancy — just real food, soon after training.

+ Chicken, beef, fish, eggs, turkey

+ Greek yogurt, cottage cheese, milk

+ Beans, lentils, tofu if plant-based

+ About the size of your palm per meal

+ Rice, pasta, bread, potato, oats

+ Fruit (bananas, apples, berries)

+ More carbs on training days

+ Whole grain > white when possible

+ Salad, broccoli, carrots, peppers

+ Spinach, tomato, cucumber

+ Mix colors — different colors = different vitamins

+ Frozen is just as good as fresh

11 — MINDSET / WHAT SEPARATES THE KIDS WHO MAKE IT

THE *rules.*

Talent is real. So is luck. But the kid who shows up four times a week for twelve weeks straight, who pays attention to detail, who treats every rep like it matters — that kid passes the more talented kid eventually. Every time.

These aren't motivational quotes. These are the mental rules every player I've coached at any serious level lives by. Pick the ones that matter to you. Tape them somewhere you'll see them every day.

01 SHOW UP ANYWAY

The hardest sessions are the ones you don't want to do. Those are the ones that count most.

02 TRUST THE PROCESS

Some weeks you'll feel worse than the week before. The numbers at the next test will tell the real story.

03 DETAIL OBSESSED

A good rep done 48 times beats a sloppy rep done 480 times. Quality is what separates kids in the long run.

04 COMPETE WITH YESTERDAY

Don't compare to the kid on Instagram. Compare to the version of yourself from one phase ago.

05 FALL IN LOVE WITH THE WORK

The kids who go furthest aren't the ones who love the games most. They're the ones who love the practice.

*"The kids who keep their numbers in a notebook and show up four times a week for twelve weeks **are the kids who become real hockey players.**"*

12 — ABOUT THE COACH

EDU	M.ED. SPORT SCIENCE
EXP	10+ YEARS COACHING
ROLES	HOCKEY PERFORMANCE COACH
TEACHES	PE & SPORT SCIENCE
BRAND	FOUNDER, ELITE HOCKEY DRILLS

— FROM THE COACH

COACH DAVID CIBOCH

**M.ED. SPORT SCIENCE / STRENGTH &
CONDITIONING / HOCKEY**

I'm a sport science coach who has spent the last decade working with hockey players — from first-time skaters all the way up to international competition. I also work full-time as a Physical Education and Sport Science teacher.

I built Elite Hockey Drills because the off-ice training world is full of generic, copy-paste programs that don't respect the sport or the player. Hockey is specific. Training should be specific too. And it should be programmed for the actual age of the actual athlete — which is why this ages 12—14 edition exists.

What you just spent twelve weeks doing is real work — the same principles I use with the players I coach in person at national-team level. If you took it seriously, you're already ahead of most kids your age. Keep going. Move well. Train smart. Have fun with it.

*“The kids who train smart at 12
become the players everyone watches
at 18.”*

— COACH DAVID

— MORE IS ON THE WAY

YOU FINISHED TWELVE WEEKS. *what's next?*

More programs. An off-ice training app. Drills you can't find anywhere else. Daily content, new tests, advanced phases, age progressions, position-specific training. The work continues.

ADVANCED PROGRAM COMING NEXT

The next age band is in production. Stack it on top of what you've just done. Same structure. Same method. Slightly more advanced load, real plyometric progressions, and the hockey-specific qualities you've earned the right to train.

COMING SOON

The Elite Hockey Drills App — 228+ exercises across 15 categories, full structured programs, video demos for every exercise, progress tracking, weekly new content. Built specifically for hockey players. Founders pricing available on the waitlist.

*“Be the first to know when the app drops.
Weekly off-ice drills, coaching tips, and behind-the-scenes
content.”*
