

— THE 12-WEEK OFF-ICE POWER + SPEED PROGRAM

POWER & *speed.*

The complete twelve-week off-season program for elite junior hockey players. Block periodization. Reactive plyometrics. Resisted sprints. Bands and bodyweight only — no gym required. Built to the same coaching standard used with national-team athletes.

01 — WELCOME / READ THIS FIRST

TWELVE WEEKS TO BECOME A *faster*, STRONGER PLAYER.

This is not a kids' program. This is a real off-season power and speed plan built for athletes in the Train-to-Compete window of long-term athletic development — the years when your body responds to serious training in ways it never has before, and probably won't again until your mid-twenties.

Twelve weeks. Four sessions a week. About 65–75 minutes each. Bodyweight and bands only — no barbells, no dumbbells, no plates. Built that way on purpose. You can do this in your garage, in a basement, on a turf field, on a driveway. Equipment is not the limit. Effort is.

The program is structured as three four-week blocks. **Foundation. Specific Prep. Power Realization.** Each block has a job. The job builds on the block before. You test at the start, at the end of every block, and at the very end of week 12.

This isn't a circuit. Every session has six architectural blocks — RAMP, Primer, Power, Strength, Energy Systems, Cool-Down — and every block has a training intent. You will know exactly what every exercise is for and why it's there.

Adolescent rules apply: no 1RM testing, no chasing maxes, progressive overload only. We use sub-maximal proxies and reactive measures to track progress. The volume reduces in week 4, week 8, and the final taper. **You don't earn results by being tired. You earn them by being precise.**

If you take this seriously for twelve weeks, you will be measurably faster, more powerful, more durable, and harder to play against. The numbers will prove it.

— FROM THE COACH

FOUNDER, ELITE HOCKEY DRILLS

*Coach
David*

02 — THE METHOD / WHY THIS WORKS

BLOCK PERIODIZATION, HOCKEY *specific.*

This program follows the block periodization model used at the highest levels of strength and conditioning — the same approach that NHL, NCAA D1, and elite junior programs use during their off-seasons.

The principle: instead of training every quality at once (a little strength, a little power, a little conditioning every week), we concentrate specific adaptations into three sequential blocks. Each block produces a residual that the next block exploits.

Block 1 builds tendon stiffness, single-leg control, and a base of work capacity. Block 2 uses that base to drive intensive plyometrics and resisted acceleration. Block 3 converts the strength and power you built into hockey-relevant speed and shift-matching conditioning.

The other piece: **hockey transfer**. Every session contains lateral work, every session contains rotational or anti-rotational core, single-leg work is at least 40% of the lower-body volume, and adductor strength is trained at minimum twice per week. These are non-negotiable for the sport.

01

BLOCK FOCUS, NOT MIXED BAG

Each block has a primary adaptation. Don't try to be everywhere at once. Foundation builds capacity. Specific Prep builds force. Realization expresses speed.

02

SINGLE-LEG AND LATERAL — EVERY WEEK

Hockey is played one leg at a time, on edges, with constant change of direction. Bilateral barbell work doesn't transfer the way coaches used to think. Single-leg, lateral, and rotational vectors live in every session.

03

SUB-MAX, NEVER 1RM

Adolescents adapt fastest through progressive overload, not max-effort testing. We use RPE, tempo prescriptions, and reactive proxies. The body gets stronger without the spinal-loading risks of maximal lifting.

“Block periodization done correctly is the closest thing in sport science to a cheat code.”

03 — THE ROADMAP / WHERE WE'RE GOING

THREE BLOCKS. ONE *plan.*

Three four-week blocks. Each block has one job. Each block ends with a deload week and a mid-block test. The whole twelve weeks ends with a full combine and a 3–5 day taper.

THE WEEKLY RHYTHM — REPEATS EVERY WEEK

DAY 1

Lower body power —
vertical, linear, posterior
chain

DAY 2

Upper body power — push,
pull, anti-rotation core

DAY 3

Lateral power — speed/
agility, adductor focus

DAY 4

Full-body power
conditioning — energy
systems

FOUR DAYS WITH MIN 48H BETWEEN DAY 1 AND DAY 3 (BOTH LOWER-BODY INTENSIVE).

01

FOUNDATION

WEEKS 01–04 · EXTENSIVE

MOVEMENT QUALITY · TENDON STIFFNESS

“Build the engine before you rev it.”

02

SPECIFIC PREP

WEEKS 05–08 · STRENGTH-POWER

INTENSIVE PLYOS · RESISTED SPRINTS

“Now we turn capacity into force.”

03

POWER REALIZATION

WEEKS 09–12 · SPEED CONVERSION

REACTIVE PLYOS · MAX VELOCITY

“Express it. On purpose.”

04 — HOW TO USE THIS PROGRAM

SIX BLOCKS EVERY *session.*

Every session — all 48 of them across these 12 weeks — follows the same six-block architecture. The architecture is not negotiable. Each block has a training intent and a time budget. Total session length: 60–75 minutes.

01	04
RAMP · 8–10 MIN	STRENGTH · 15–20 MIN
Raise, Activate, Mobilize, Potentiate. Hockey-specific warm-up that prepares your CNS, hips, t-spine, and adductors. Listed on page 7.	Bodyweight + band strength. Unilateral bias. Tempo prescriptions. Anti-rotation core. Adductor work in most sessions.
02	05
CNS PRIMER · 8–12 MIN	ENERGY SYSTEM · 8–12 MIN
Low-volume, high-quality plyo or activation that wakes up the nervous system before the main work.	Alactic or alactic-aerobic intervals matching shift demand. Built to make you the player who's still skating hard in the third period.
03	06
POWER / SPEED · 15–20 MIN	COOL-DOWN · 3–5 MIN
The fast stuff. Jumps, sprints, contrast work. Max intent every rep. Full rest between sets.	Nasal breathing, mobility flow. How you switch off the system so recovery starts immediately. Listed on page 8.

THE EXERCISE

3 × 8 BOTH SIDES

SETS × REPS

3010 · RPE 7

TEMPO / BAND TENSION / RPE

05 — WHAT YOU'LL NEED

THE *kit.*

No barbells. No dumbbells. No plates. No gym membership. This program is built around bodyweight and bands because bands give you the variable tension and explosive overload that's actually most relevant to hockey — and they cost less than a tank of gas.

ITEM 01

LOOP BAND SET

LIGHT · MEDIUM · HEAVY · ESSENTIAL

Three loop bands of different tensions — light, medium, heavy. Used for resisted sprints, banded squats and presses, glute activation, pull-up assistance, and contrast loading. The single most important piece of equipment in this program.

“Buy a set. You’ll use these for the next ten years.”

ITEM 02

PULL-UP BAR

DOORWAY OR FIXED · ESSENTIAL

A pull-up bar — doorway-mounted or fixed. Used for pulls, dead hangs, hanging knee raises, and grip work. Hockey players need pulling strength and grip — there's no good way to train them without one.

“Cheap doorway bars work. The fixed ones are better if you have the spot.”

ITEM 03

STURDY BOX OR BENCH

KNEE TO HIP HEIGHT · ESSENTIAL

A sturdy box or bench you can step on, jump off, and rest a foot on. Low height for depth drops. Knee height for step-ups and split squats. A stable patio step or coffee table works.

“Anything stable that won't collapse. Test it before you jump on it.”

ITEM 04

SPACE + TURF/ASPHALT

10M MIN STRAIGHT-LINE · ESSENTIAL

Open space — minimum 10 meters straight-line for sprints, 5 by 10 for the pro-agility. Outdoor turf or asphalt is ideal. For lateral work and bounding, a slightly bigger area helps.

“A driveway works. A turf field is better. Don't overthink it.”

OPTIONAL BUT HELPFUL Cones or markers for shuttle drills. A stopwatch or phone timer. A foam roller. A notebook for tracking your test results. Heavier tube-style band for stronger lifters in Block 2 and Block 3. A measuring tape for broad jump testing.

06 — BEFORE EVERY SESSION

THE RAMP WARM-UP.

Eight to ten minutes. Four phases. The RAMP protocol — **Raise, Activate, Mobilize, Potentiate** — is the gold-standard warm-up used at every level above youth recreation. It elevates your CNS, opens the joints that hockey tightens up, fires up your glutes and adductors, and primes your body for fast, explosive work.

R

RAISE — 90 SEC

JUMPING JACKS 30S · HIGH KNEES 30S · BUTT KICKS 30S

“Heart rate up. Body temperature up.”

Get blood moving. You should be lightly sweating by the end. Skip this and your tissues stay cold and brittle.

A

ACTIVATE — 2 MIN

GLUTE BRIDGE × 10 · BANDED CLAMSHELL × 10 EA · BANDED LATERAL WALK × 10 EA

“Wake up the glutes and adductors.”

Hockey skating shuts down your glutes over time. This block reverses that pattern and turns on the lateral-stabilizing muscles that protect your knees and groin.

M

MOBILIZE — 3 MIN

WORLD'S GREATEST STRETCH × 5 EA · T-SPINE ROTATION × 10 · 90/90 HIP SWITCH × 6 EA

“Hips, t-spine, ankles — the three places hockey locks up.”

Skating compresses the hip flexors, rounds the thoracic spine, and stiffens the ankle. Three movements undo all of it in three minutes.

P

POTENTIATE — 90 SEC

POGO HOPS × 10 · DROP SQUAT × 5 · A-SKIP × 10M

“Wake up the nervous system. Feel fast.”

Three short bursts of explosive, low-volume work that tell your nervous system the main session is about to start. Skip this and the first power set of your day is your real warm-up — except you'll do it cold.

07 — AFTER EVERY SESSION

THE cool-down.

Three to five minutes. The cool-down is how you tell your nervous system the hard work is over. Recovery doesn't start when you get home — it starts the moment training ends. Athletes who consistently do this recover faster, sleep better, and adapt to training more completely than athletes who skip it.

01 SLOW WALK WITH NASAL BREATHING

60–90 SECONDS

“In through the nose. Out through the nose.”

Walk slowly. Breathe in and out through your nose only. Long, slow breaths. This shifts your nervous system from sympathetic (training mode) to parasympathetic (recovery mode) within about a minute.

02 90/90 HIP STRETCH + T-SPINE OPENER

60 SECONDS EACH SIDE

“Open what training tightened.”

Sit in the 90/90 hip position. Rotate your torso open to the trail-leg side, reaching long with one arm. This unlocks both the deep external rotators of the hip and the thoracic spine in one go.

03 LEGS UP THE WALL + BREATH

90–120 SECONDS

“Heavy legs. Quiet mind. 4-second exhales.”

Lie on your back with your legs straight up against a wall. Breathe in for 4 seconds, out for 6. Repeat. This is where the work locks in — circulation restored, nervous system fully transitioned, mind cleared.

— PRE-PROGRAM SCREEN (BEFORE WEEK 1)

Can you hold a clean bodyweight squat at full depth for 30 seconds? A 60-second strict plank? 10 strict toe push-ups? If any answer is no, spend an extra week in Block 1 before progressing. If you're still going through growth-related joint pain (knees, heels, lower back), halve plyometric volume and tell a coach. No exceptions.

08 — BEFORE YOU START / THE TESTING BATTERY

SEVEN TESTS. FOUR *checkpoints*.

You test at Week 0 (before Day 1), at the end of Block 1 (Week 4), at the end of Block 2 (Week 8), and at the end of Week 12. Every test is sub-maximal, reactive, or technique-controlled — no 1RM testing. The same protocol every time so the numbers are comparable.

- 01 VERTICAL JUMP — COUNTER-MOVEMENT
Stand, reach to mark wall. Jump, mark highest reach. Difference = vertical. 3 attempts, best counts. Expected gain: 4–8 cm across program.
- 02 BROAD JUMP — MAX WITH STICK
Standing start. 3 attempts. Best counts. Must stick the landing. Measure heel-to-line. Expected gain: 15–25 cm.
- 03 10M SPRINT — HAND TIMED
From 2-point stance. 2 attempts, full recovery between. Best time counts. Expected gain: 0.15–0.30 sec.
- 04 5-10-5 PRO-AGILITY
Standard NHL combine shuttle. 2 attempts each starting direction. Best counts. Expected gain: 0.20–0.40 sec.
- 05 SINGLE-LEG BROAD JUMP — SYMMETRY
3 attempts each leg. Best counts. Calculate L:R ratio. Target: under 10% asymmetry by Week 12.
- 06 COPENHAGEN PLANK — MAX HOLD
Long-lever version. Time to form break. Adductor endurance benchmark. Both sides. Expected gain: 15–25 seconds.
- 07 PALLOF ISO HOLD — ANTI-ROTATION
Heavy band, arms locked out. Time to rotation. Both sides. Anti-rotation strength proxy. Expected gain: 10–20 sec.

— PROTOCOL NOTES

Full warm-up (the RAMP from page 7) before any test. Full rest between attempts. Test in same order, same surface, same shoes every time. Write down every number — the numbers tell the story.

01

WEEKS

01-04 / 16 SESSIONS

FOCUS

MOVEMENT QUALITY · TENDON STIFFNESS

EQUIPMENT

BW + BANDS

FOUNDATION.

“Build the engine before you rev it.”

Block 1 is where the next twelve weeks are won or lost. We're not chasing intensity yet — we're building the tissue, motor patterns, and aerobic base that every later block will demand of you.

Extensive plyometrics teach your tendons to absorb load and your nervous system to coordinate the basic athletic patterns. Banded strength work builds capacity in the positions hockey actually demands — single-leg, anti-rotation, adductor.

Volume is moderate. Intensity is moderate. Movement quality is non-negotiable. If a rep is ugly, drop the load, drop the tempo, reset. Week 4 is a deload week — volume drops, intent stays high — then we test.

— BLOCK FOCUS

Movement quality over load. Tendons before tissue. Single-leg dominance. Adductor activation every session. Week 4 = deload + mid-block test.

01

— FIRST WEEK OF THE BLOCK.
WEEK 01
FOUNDATION

DAYS 1 & 2

Movement quality week. Every rep teaches your body the pattern. Don't chase fatigue.

DAY 1

LOWER POWER + POSTERIOR CHAIN

— PRIMER · 10 MIN

04

— DELOAD WEEK. THEN THE TEST.
WEEK 04
FOUNDATION · DELOAD

DAYS 1 & 2

MID-BLOCK TEST AT END OF WEEK

Deload week — volume drops sharply, intent stays high. Mid-block test at the end.

DAY 1

LOWER POWER + POSTERIOR CHAIN

— PRIMER · 10 MIN

- 01 **POGO HOPS**
stiff ankles, ground feels hot
2 × 10
RPE 6 · REST 60S
- 02 **ANKLE HOP STICK**
stick each landing 2 sec
2 × 4
MAX INTENT · REST 60S

— POWER · 18 MIN

- 03 **BW SQUAT JUMP**
max height, soft land, reset
3 × 3
RPE 8 · REST 90S
- 04 **BROAD JUMP — STICK**
max distance, stick the landing
2 × 3
MAX EFFORT · REST 90S

— STRENGTH · 20 MIN

- 05 **REAR-FOOT ELEVATED SPLIT SQUAT**
drive full foot, vertical shin
2 × 6 BOTH SIDES
3010 · RPE 7 · REST 90S
- 06 **BANDED RDL**
hips back, soft knees, hinge
2 × 8
3010 · MEDIUM BAND · REST 90S
- 07 **BANDED GLUTE BRIDGE**
drive heels, squeeze top
2 × 12
2012 · MEDIUM BAND · REST 90S
- 08 **COPENHAGEN PLANK — SHORT**
top knee on bench, hips up
2 × 15S BOTH SIDES
ADDUCTOR · REST 90S

— ESD · 10 MIN

- 09 **TEMPO BW CIRCUIT**
squat/push-up/row, smooth pace
4 × 30S/30S
RPE 6

DAY 2

UPPER POWER + ANTI-ROTATION CORE

— PRIMER · 10 MIN

- 01 **BAND PULL-APART**
squeeze blades, slow return
2 × 12
LIGHT BAND · REST 60S
- 02 **BAND FACE PULL**
elbows high, external rotation
2 × 10
LIGHT BAND · REST 60S

— POWER · 15 MIN

- 03 **PLYO PUSH-UP (KNEES)***
*requires 10 strict toe push-ups
2 × 3
MAX EFFORT · REST 90S

END OF BLOCK 01 · WEEK 04

MID-BLOCK

test one.

Four weeks in. Test today. You should see meaningful gains on Copenhagen plank, Pallof iso, and broad jump symmetry. Vertical jump and 10m sprint may move a little — they move more in Block 2.

01 VERTICAL JUMP
Counter-movement. 3 attempts. Best counts.

02 BROAD JUMP — MAX
Stick landing. 3 attempts. Best counts.

03 10M SPRINT
2-point start. 2 attempts. Best time.

04 5-10-5 PRO-AGILITY
2 attempts each direction. Best counts.

05 SL BROAD JUMP SYMMETRY
3 ea leg. Best counts. L:R ratio.

06 COPENHAGEN PLANK — MAX HOLD
Long-lever. Both sides.

07 PALLOF ISO — MAX HOLD
Heavy band. Both sides.

BLOCK 01 SCORECARD			VS WEEK ZERO
TEST	WEEK 0	WEEK 4	CHANGE
Vertical Jump	___ cm	___ cm	+ ___
Broad Jump	___ cm	___ cm	+ ___
10m Sprint	___ s	___ s	- ___
5-10-5 Shuttle	___ s	___ s	- ___
SL Broad Jump L / R	___ / ___	___ / ___	___ %
Copenhagen L / R	___ / ___	___ / ___	+ ___
Pallof Iso L / R	___ / ___	___ / ___	+ ___

— BLOCK ZERO TWO 02 · STRENGTH-POWER

02

WEEKS

05–08 / 16 SESSIONS

FOCUS

INTENSIVE PLYOS · RESISTED SPRINTS

EQUIPMENT

BW + BANDS

SPECIFIC PREP.

“Now we turn capacity into force.”

Block 2 is where you become measurably more powerful. We move from extensive plyos to intensive — broad jumps, lateral bounds, depth drops. The tendon stiffness you built in Block 1 lets you handle this work without breaking down.

Strength work shifts to banded loaded jumps and contrast methods — heavy band loaded squat into unloaded jump, training the body to express force fast. Acceleration sprints with bands teach you to push the ground harder than you thought you could.

Alactic capacity work begins — 8 to 15 second efforts at near-max with full recovery. This is the energy system that fuels the first three strides of every shift. Week 8 is deload + mid-block test.

— BLOCK FOCUS

Intensive plyos. Contrast / complex training. Resisted acceleration. Alactic capacity. Adductor + anti-rotation every week. Week 8 = deload + mid-block test.

05

— FIRST WEEK OF THE BLOCK.

WEEK 05
SPECIFIC PREP

DAYS 1 & 2

Intensive plyos begin. Every jump max effort. Every set with full recovery.

DAY 1

LOWER POWER + POSTERIOR CHAIN

— PRIMER · 10 MIN

- 01 **SINGLE-LEG POGO HOPS**
soft, fast — quiet feet
3 × 8 BOTH SIDES
RPE 7 · REST 60S
- 02 **DROP SQUAT**
absorb fast, freeze position
3 × 5
FAST DOWN · REST 60S

— POWER · 20 MIN

- 03 **BANDED SQUAT JUMP**
band over shoulders, max effort
4 × 4
MEDIUM BAND · REST 90S
- 04 **CONTINUOUS BROAD JUMP**
3 in a row, no reset
3 × 3
MAX EFFORT · REST 90S
- 05 **DEPTH DROP (LOW BOX)**
absorb the landing, no jump
3 × 4
REACTIVE PREP · REST 90S

— STRENGTH · 20 MIN

- 06 **BANDED FRONT SQUAT**
band over shoulders, deep + slow
3 × 6
3110 · HEAVY BAND · REST 90S
- 07 **SINGLE-LEG RDL — BAND**
stick the bottom 1 sec
3 × 6 BOTH SIDES
3010 · MEDIUM BAND · REST 90S
- 08 **COPENHAGEN PLANK — LONG**
ankle on bench, hips up
2 × 15S BOTH SIDES
ADDUCTOR · REST 90S

— ESD · 10 MIN — ALACTIC

- 09 **SPRINT INTERVALS 15S**
max effort, full recovery
6 × 15S / 90S
MAX EFFORT

~70 MIN

DAY 2

UPPER POWER + ANTI-ROTATION CORE

— PRIMER · 8 MIN

- 01 **BANDED Y-T-W**
scap activation, full range
3 × 8 BOTH SIDES WAY
LIGHT BAND · REST 60S

— POWER · 18 MIN

- 02 **CLAP PUSH-UP***
**requires 8 strict toe push-ups*
3 × 4
MAX EFFORT · REST 90S
- 03 **BANDED CHEST PRESS — EXPLOSIVE**
fast concentric, slow eccentric
4 × 5
30X0 · HEAVY BAND · REST 90S
- 04 **BANDED PULL-APART POWER**
fast pull, slow return
3 × 8
MEDIUM BAND · REST 90S

— STRENGTH · 18 MIN

- 05 **DEFICIT PUSH-UP**
hands on books, full ROM
3 × 8
3010 · RPE 8 · REST 90S
- 06 **BANDED ROW (STANDING)**
hinge, row to ribs
3 × 10
2012 · HEAVY BAND · REST 90S
- 07 **PALLOF PRESS — KNEELING**
ribs down, resist rotation
3 × 8 BOTH SIDES
2010 · HEAVY BAND · REST 90S
- 08 **BANDED CHOP**
hips lead, control the band
3 × 8 BOTH SIDES
MEDIUM BAND · REST 90S

— ESD · 8 MIN

- 09 **HANGING KNEE RAISE**
control, no swinging
3 × 8
GRIP + CORE
- 10 **HOLLOW ROCK**
small range, controlled
3 × 10
RPE 7

~70 MIN

05

— FIRST WEEK OF THE BLOCK.

WEEK 05
SPECIFIC PREP

DAYS 3 & 4 (CONT.)

DAY 3

LATERAL POWER + SPEED + ADDUCTOR

— PRIMER · 10 MIN

01 **BANDED LATERAL WALK**
knees over toes, low stance
 3 × 10 BOTH SIDES
 MEDIUM BAND · REST 60S

02 **COSSACK SQUAT**
warmup version — flow
 2 × 5 BOTH SIDES
 MOBILITY · REST 60S

— POWER · 18 MIN

03 **CONTINUOUS LATERAL BOUND**
rhythm, max distance
 3 × 4 BOTH SIDES
 MAX INTENT · REST 90S

04 **SKATER HOP — CONTINUOUS**
no pause, push-off explosive
 3 × 5 BOTH SIDES
 MAX EFFORT · REST 90S

05 **CROSSOVER STEP BOUND**
snap the hips, full extension
 3 × 3 BOTH SIDES
 MAX · REST 90S

— SPEED · 15 MIN — RESISTED ACCEL

06 **BAND-RESISTED 10M SPRINT**
partner-held, drive every step
 4 × 10M
 MAX EFFORT · REST FULL

07 **REACTIVE LATERAL START**
react to cue, push the ground
 4 × 5M BOTH SIDES
 MAX · REST FULL

— ADDUCTOR · 10 MIN

08 **BANDED STANDING ADDUCTION**
control, slow tempo
 3 × 10 BOTH SIDES
 3010 · MEDIUM BAND · REST 60S

09 **LATERAL LUNGE — BANDED**
lead leg eccentric focus
 3 × 8 BOTH SIDES
 3010 · MEDIUM BAND · REST 60S

~70 MIN

SEE GLOSSARY P.45

DAY 4

FULL-BODY POWER + ENERGY SYSTEMS

— PRIMER · 8 MIN

01 **WORLD'S GREATEST STRETCH**
open hip, rotate, reach
 2 × 4 BOTH SIDES
 MOBILITY · REST 60S

— POWER CONTRAST · 22 MIN

02 **BANDED SQUAT (HEAVY)**
deep, controlled, max tension
 4 × 5
 3110 · HEAVY BAND · REST 90S

03 **BROAD JUMP (UNLOADED)**
max distance, after the squat
 4 × 3
 MAX EFFORT · REST 90S

04 **BANDED CHEST PRESS**
heavy band, controlled
 3 × 8
 3010 · HEAVY BAND · REST 90S

05 **PLYO PUSH-UP**
after press — explosive
 3 × 4
 MAX · REST 90S

— ESD · 12 MIN — ALACTIC POWER

06 **REPEAT BROAD JUMP**
5 jumps, walk back, repeat
 5 × 5 JUMPS / 90S
 MAX EFFORT

— ACCESSORY · 8 MIN

07 **BANDED ROTATIONAL PRESS**
hips lead, lock at top
 3 × 8 BOTH SIDES
 MEDIUM BAND · REST 60S

08 **FARMER CARRY (BANDED)**
band pulls down, stay tall
 3 × 30S
 HEAVY BAND · REST 60S

~65 MIN

SEE GLOSSARY P.45

06

— VOLUME BUILDS.

WEEK 06
SPECIFIC PREP

DAYS 1 & 2

Volume builds. Contrast methods (band loaded + unloaded) drive the power adaptations.

DAY 1

LOWER POWER + POSTERIOR CHAIN

— PRIMER · 10 MIN

01 SINGLE-LEG POGO HOPS

soft, fast — quiet feet

3 × 10 BOTH SIDES

RPE 7 · REST 60S

02 DROP SQUAT

absorb fast, freeze position

3 × 6

FAST DOWN · REST 60S

END OF BLOCK 02 · WEEK 08

MID-BLOCK

test two.

Eight weeks in. The middle of the program. Vertical jump and broad jump usually take their first big step here. Acceleration sprints get faster. Lateral bound distances jump up. Compare against Block 1 test.

01 VERTICAL JUMP
Counter-movement. 3 attempts. Best counts.

02 BROAD JUMP — MAX
Stick landing. 3 attempts. Best counts.

03 10M SPRINT
2-point start. 2 attempts. Best time.

04 5-10-5 PRO-AGILITY
2 attempts each direction. Best counts.

05 SL BROAD JUMP SYMMETRY
3 ea leg. Best counts. L:R ratio.

06 COPENHAGEN PLANK — MAX HOLD
Long-lever. Both sides.

07 PALLOF ISO — MAX HOLD
Heavy band. Both sides.

BLOCK 02 SCORECARD			VS WEEK 04
TEST	WEEK 4	WEEK 8	CHANGE
Vertical Jump	___ cm	___ cm	+ ___
Broad Jump	___ cm	___ cm	+ ___
10m Sprint	___ s	___ s	- ___
5-10-5 Shuttle	___ s	___ s	- ___
SL Broad Jump L / R	___ / ___	___ / ___	___ %
Copenhagen L / R	___ / ___	___ / ___	+ ___
Pallof Iso L / R	___ / ___	___ / ___	+ ___

— BLOCK ZERO THREE 03 · SPEED CONVERSION

03

WEEKS

09–12 / 16 SESSIONS

FOCUS

REACTIVE PLYOS · MAX VELOCITY

EQUIPMENT

BW + BANDS

POWER REALIZATION.

“Express it. On purpose.”

Block 3 is where the work pays off. We move into reactive and shock plyos — depth jumps, repeat bounds, lateral depth drops. These are the highest-intensity plyometrics in the program and the most demanding on your nervous system.

Sprint work converts to maximum velocity — 30m flys with run-ins — and change-of-direction work via the 5-10-5 pro-agility and reactive 4-cone drills. This is hockey speed: not just fast in a straight line, but fast at changing direction under fatigue.

Energy system work matches the actual shift demands of a hockey game: 45 to 90 second high-intensity efforts with structured recovery. Week 12 includes a 3 to 5 day taper before the final combine — volume drops sharply, intent stays maximal.

— BLOCK FOCUS

Reactive/shock plyos. Max velocity + COD. Complex training. Alactic-aerobic intervals matching shift demands. Week 12 = taper + final combine.

09

— FIRST WEEK OF THE BLOCK.

WEEK 09

POWER REALIZATION

DAYS 1 & 2

Reactive plyos begin. Depth jumps. Repeat bounds. The most demanding plyos in the program.

DAY 1

LOWER POWER + POSTERIOR CHAIN

— PRIMER · 8 MIN

01 HIGH-LOW POGO COMBO

5 low + 5 high, alternate

3 × 10

REACTIVE · REST 60S

02 DEPTH DROP — STICK

absorb fast, freeze

3 × 4

REACTIVE PREP · REST 60S

— POWER · 22 MIN — REACTIVE

03 DEPTH JUMP (LOW BOX)

minimum ground contact, max height

4 × 3

MAX EFFORT · REST 90S

04 BANDED LOADED JUMP

heavy band, max vertical

4 × 4

HEAVY BAND · REST 90S

05 CONTRAST JUMP

banded jump → unloaded jump

3 × (3+3)

CONTRAST · REST 90S

— STRENGTH · 15 MIN

06 REAR-FOOT ELEVATED SS — PAUSE

pause 2 sec at bottom

3 × 6 BOTH SIDES

3210 · RPE 8 · REST 90S

07 SINGLE-LEG RDL — TEMPO

stick the bottom 2 sec

3 × 6 BOTH SIDES

3210 · MEDIUM BAND · REST 90S

— ESD · 10 MIN — ALACTIC-AEROBIC

08 REPEAT SPRINT ABILITY

match shift demand

6 × 30S / 60S

85% EFFORT

~70 MIN

SEE GLOSSARY P.45

DAY 2

UPPER POWER + ANTI-ROTATION CORE

— PRIMER · 8 MIN

01 BAND FACE PULL POWER

fast pull, slow return

3 × 10

MEDIUM BAND · REST 60S

— POWER · 20 MIN

02 CLAP PUSH-UP — REPEAT

minimum contact, fast

4 × 4

MAX REACTIVE · REST 90S

03 BANDED CHEST PRESS — CONTRAST

heavy + unloaded push-up

3 × (5+3)

CONTRAST · REST 90S

04 BANDED PULL-APART — EXPLOSIVE

snap the band apart

3 × 8

MEDIUM BAND · REST 90S

— STRENGTH · 18 MIN

05 ARCHER PUSH-UP

one side bears the load

3 × 4 BOTH SIDES

3010 · RPE 8 · REST 90S

06 BANDED ROW — PAUSE

2 sec pause at the ribs

3 × 8

30X0 · HEAVY BAND · REST 90S

07 PALLOF PRESS — ROTATION HOLD

press, hold, fight rotation

3 × 6 BOTH SIDES / 5S

HEAVY BAND · REST 90S

08 BANDED LIFT (CHOP UP)

low to high, hips lead

3 × 8 BOTH SIDES

MEDIUM BAND · REST 90S

— ESD · 8 MIN

09 HANGING KNEE RAISE — STRICT

no swing, slow control

3 × 8

GRIP + CORE

~70 MIN

12

— TAPER WEEK. THEN THE FINAL COMBINE.

WEEK 12

POWER REALIZATION · TAPER

DAYS 1 & 2

FINAL COMBINE AT END OF WEEK

Taper. Volume cuts in half. Intent stays maximal. Final combine at the end of the week.

DAY 1

LOWER POWER + POSTERIOR CHAIN

— PRIMER · 8 MIN

01 HIGH-LOW POGO COMBO

5 low + 5 high, alternate

2 × 8

REACTIVE · REST 60S

02 DEPTH DROP — STICK

absorb fast, freeze

2 × 3

REACTIVE PREP · REST 60S

— POWER · 22 MIN — REACTIVE

03 DEPTH JUMP (LOW BOX)

minimum ground contact, max height

2 × 3

MAX EFFORT · REST 90S

04 BANDED LOADED JUMP

heavy band, max vertical

3 × 3

HEAVY BAND · REST 90S

05 CONTRAST JUMP

banded jump → unloaded jump

2 × (3+3)

CONTRAST · REST 90S

— STRENGTH · 15 MIN

06 REAR-FOOT ELEVATED SS — PAUSE

pause 2 sec at bottom

2 × 5 BOTH SIDES

3210 · RPE 8 · REST 90S

07 SINGLE-LEG RDL — TEMPO

stick the bottom 2 sec

2 × 5 BOTH SIDES

3210 · MEDIUM BAND · REST 90S

— ESD · 10 MIN — ALACTIC-AEROBIC

08 REPEAT SPRINT ABILITY

match shift demand

4 × 30S / 60S

85% EFFORT

~70 MIN

SEE GLOSSARY P.45

DAY 2

UPPER POWER + ANTI-ROTATION CORE

— PRIMER · 8 MIN

01 BAND FACE PULL POWER

fast pull, slow return

2 × 10

MEDIUM BAND · REST 60S

— POWER · 20 MIN

02 CLAP PUSH-UP — REPEAT

minimum contact, fast

2 × 3

MAX REACTIVE · REST 90S

03 BANDED CHEST PRESS — CONTRAST

heavy + unloaded push-up

2 × (4+3)

CONTRAST · REST 90S

04 BANDED PULL-APART — EXPLOSIVE

snap the band apart

2 × 8

MEDIUM BAND · REST 90S

— STRENGTH · 18 MIN

05 ARCHER PUSH-UP

one side bears the load

2 × 4 BOTH SIDES

3010 · RPE 8 · REST 90S

06 BANDED ROW — PAUSE

2 sec pause at the ribs

2 × 8

30X0 · HEAVY BAND · REST 90S

07 PALLOF PRESS — ROTATION HOLD

press, hold, fight rotation

2 × 6 BOTH SIDES / 5S

HEAVY BAND · REST 90S

08 BANDED LIFT (CHOP UP)

low to high, hips lead

2 × 8 BOTH SIDES

MEDIUM BAND · REST 90S

— ESD · 8 MIN

09 HANGING KNEE RAISE — STRICT

no swing, slow control

2 × 8

GRIP + CORE

~70 MIN

SEE GLOSSARY P.45

12

— TAPER WEEK. THEN THE FINAL COMBINE.

WEEK 12

POWER REALIZATION · TAPER

DAYS 3 & 4 (CONT.)

FINAL COMBINE AT END OF WEEK

DAY 3

MAX VELOCITY + COD + ADDUCTOR

— PRIMER · 10 MIN

- 01 **A-SKIP + B-SKIP**
tall, bouncy, mechanics
2 × 15M BOTH SIDES
MECHANICS · REST 60S
- 02 **BANDED LATERAL WALK**
low stance, knees out
2 × 10 BOTH SIDES
MEDIUM BAND · REST 60S

— POWER · 15 MIN — REACTIVE LATERAL

- 03 **LATERAL DEPTH DROP TO BOUND**
absorb sideways, explode out
2 × 3 BOTH SIDES
MAX REACTIVE · REST 90S
- 04 **CONTINUOUS SKATER HOP**
max distance, rhythm
2 × 5 BOTH SIDES
MAX EFFORT · REST 90S

— SPEED · 18 MIN — MAX VELOCITY + COD

- 05 **30M FLY SPRINT**
20m run-in, 10m max velocity
3 × 30M
MAX VELOCITY · REST FULL
- 06 **5-10-5 PRO-AGILITY**
low, plant hard, accelerate out
3 × SHUTTLE
MAX · REST FULL
- 07 **REACTIVE 4-CONE**
react to cue, change direction
2 × PATTERN
MAX · REST FULL

— ADDUCTOR · 12 MIN

- 08 **COPENHAGEN PLANK — LONG**
ankle on bench, hips lifted
2 × 15S BOTH SIDES
ADDUCTOR · REST 60S
- 09 **BANDED LATERAL LUNGE**
drive back to start, control
2 × 8 BOTH SIDES
2010 · MEDIUM BAND · REST 60S

~75 MIN

SEE GLOSSARY P.45

DAY 4

FULL-BODY POWER + ALACTIC-AEROBIC ESD

— PRIMER · 8 MIN

- 01 **WORLD'S GREATEST STRETCH**
full body prep, slow flow
2 × 4 BOTH SIDES
MOBILITY · REST 60S

— POWER CONTRAST · 20 MIN

- 02 **BANDED SQUAT JUMP**
heavy band, max effort
2 × 3
HEAVY BAND · REST 90S
- 03 **UNLOADED SQUAT JUMP**
after band, max height
2 × 3
MAX EFFORT · REST 90S
- 04 **CLAP PUSH-UP**
max reactive, full extension
2 × 3
MAX REACTIVE · REST 90S

— ESD · 15 MIN — SHIFT SIMULATION

- 05 **REPEAT SPRINT ABILITY**
matches 45-90s shift demand
3 × 45S / 90S
85-95% EFFORT

— ACCESSORY · 10 MIN

- 06 **PALLOF PRESS — DYNAMIC**
press, walk forward + back
2 × 8 BOTH SIDES
HEAVY BAND · REST 60S
- 07 **DRAGON FLAG NEGATIVES**
slow lower, 4 sec each
2 × 3
4010 · RPE 8 · REST 60S

~65 MIN

SEE GLOSSARY P.45

END OF WEEK 12 · THE COMBINE

FINAL combine.

Twelve weeks of work. Forty-eight sessions. This is the final combine. Same seven tests as Week 0. Full warm-up. Full rest between tests. Give everything you have. Then compare across the entire program.

01 VERTICAL JUMP
Counter-movement. 3 attempts. Best counts.

02 BROAD JUMP — MAX
Stick landing. 3 attempts. Best counts.

03 10M SPRINT
2-point start. 2 attempts. Best time.

04 5-10-5 PRO-AGILITY
2 attempts each direction. Best counts.

05 SL BROAD JUMP SYMMETRY
3 ea leg. Best counts. L:R ratio.

06 COPENHAGEN PLANK — MAX HOLD
Long-lever. Both sides.

07 PALLOF ISO — MAX HOLD
Heavy band. Both sides.

FINAL COMBINE SCORECARD			VS WEEK 08
TEST	WEEK 8	WEEK 12	CHANGE
Vertical Jump	___ cm	___ cm	+ ___
Broad Jump	___ cm	___ cm	+ ___
10m Sprint	___ s	___ s	- ___
5-10-5 Shuttle	___ s	___ s	- ___
SL Broad Jump L / R	___ / ___	___ / ___	___ %
Copenhagen L / R	___ / ___	___ / ___	+ ___
Pallof Iso L / R	___ / ___	___ / ___	+ ___

PRE VS POST / THE PROOF

YOU VS
you.

Week 0 vs Week 12. Same athlete. Twelve weeks apart. Forty-eight structured training sessions. This is the proof.

PRE VS POST — THE 12-WEEK SCORECARD				WEEK 0 → WEEK 12	
TEST	WEEK 0	WEEK 12	CHANGE	% GAIN	
Vertical Jump	___ cm	___ cm	+ ___	+ ___%	
Broad Jump	___ cm	___ cm	+ ___	+ ___%	
10m Sprint	___ s	___ s	- ___	- ___%	
5-10-5	___ s	___ s	- ___	- ___%	
SL Symmetry	___ %	___ %	___	___	
Copenhagen	___ s	___ s	+ ___	+ ___%	
Pallof Iso	___ s	___ s	+ ___	+ ___%	

— WHAT THE NUMBERS MEAN

A 5cm vertical jump gain is significant. A 10cm broad jump gain is substantial. A 0.20s drop on 10m sprint is the difference between winning a puck race and losing one. **You did this. Nobody did it for you.** Now do another block.

“The players who train smart in their off-seasons *are the players who play in the seasons that matter.*”

— EXERCISE GLOSSARY · PART ONE

PLYOMETRICS & *speed.*

Brief technical reference for every plyometric, speed, and sprint exercise in the program. Read this once. Refer back when an exercise feels unfamiliar.

— PLYOMETRICS · EXTENSIVE

POGO HOPS

Stiff-ankle bounce in place. Minimal knee bend. Quick ground contact. Tendon stiffness. *"Ground is hot."*

ANKLE HOP STICK

Pogo, stick the landing 2 sec. Absorption + bilateral landing.

BW SQUAT JUMP

Quarter-squat down, vertical jump max height. Soft landing. Reset each rep.

BROAD JUMP — STICK

Two-foot horizontal jump for distance. Stick landing. Don't fall forward.

DROP SQUAT

Fast drop into quarter-squat. No jump. Teaches absorption.

— PLYOMETRICS · INTENSIVE

CONTINUOUS BROAD JUMP

3 jumps no reset. Each landing flows into next jump. High elastic.

LATERAL BOUND — STICK / CONTINUOUS

Push off one leg, land on the other laterally. Hockey-relevant.

SKATER HOP

Diagonal forward bound, mimicking a skating stride. Land outside foot, drive off it.

DEPTH DROP (LOW BOX)

Step off low box (15-30cm), absorb in quarter squat. No jump. Reactive prep.

BANDED LOADED JUMP

Heavy band over shoulders, vertical jump. Trains rapid force under load. Contrast pair with unloaded jump.

— PLYOMETRICS · REACTIVE

DEPTH JUMP (LOW BOX)

Drop off low box, immediately rebound to max vertical. Minimum ground-contact. Highest-intensity plyo.

REPEAT BROAD JUMP

5 broad jumps continuous, walk back, repeat. Combines alactic power + reactive strength.

CONTRAST JUMP

3 banded loaded jumps + 3 unloaded jumps. Trains body to express force after heavy load.

LATERAL DEPTH DROP TO BOUND

Step laterally off low box, absorb, then explode laterally. Block 3 only. Highest hockey-relevance.

— SPEED & SPRINT

WALL DRIVE

Arms on wall, lean forward. Drive knee up, hold 5s. First-step acceleration mechanics.

FALLING START SPRINT

Lean forward until you have to step, then sprint 10m. Natural forward angle of acceleration.

BAND-RESISTED SPRINT

Partner holds heavy band at waist as you sprint. Drives stronger push-off mechanics. 10m only.

A-SKIP / B-SKIP

Bouncy, tall skipping pattern that ingrains running mechanics. Knee drive (A), thigh extension (B).

30M FLY SPRINT

20m run-in to reach max velocity, then 10m at full speed. Block 3 max velocity work.

5-10-5 PRO-AGILITY

Sprint 5m right, 10m left, 5m right. Standard hockey-combine COD test. Plant hard, change direction explosively.

— EXERCISE GLOSSARY · PART TWO

STRENGTH & *core.*

— LOWER STRENGTH

REAR-FOOT ELEVATED SPLIT SQUAT

Rear foot on bench, front knee tracks over toes. Single-leg unilateral hammer. Hockey gold.

BANDED FRONT SQUAT

Band over shoulders, hands hold band high on chest. Provides progressive resistance at top.

BANDED RDL

Stand on band, hold ends. Hinge with hips back, soft knees. Posterior chain bilateral.

SINGLE-LEG RDL (BANDED)

Stand on band with one foot, balance on the other leg, hinge. Hamstring + glute + balance.

COSSACK SQUAT

Wide stance. Shift weight over one leg, sink deep, opposite leg stays straight. Adductor + mobility.

LATERAL LUNGE (BANDED)

Step wide, sit into lead hip. Adductor eccentric loaded. Drive back to start.

— ADDUCTOR / GROIN

COPENHAGEN PLANK — SHORT

Side plank with top knee on bench (short lever). Hips lifted. Adductor isometric. Hockey durability essential.

COPENHAGEN PLANK — LONG

Top foot on bench (long lever). Much harder. Block 2+ only after mastering short version.

BANDED STANDING ADDUCTION

Band attached lateral to standing leg. Pull leg across midline. Slow tempo. Adductor concentric.

— UPPER STRENGTH

PUSH-UP (TEMPO / DEFICIT / ARCHER)

Standard, hands elevated for deficit (more ROM), or shifted to one side for archer (unilateral emphasis).

PLYO / CLAP PUSH-UP

Push hard enough that hands leave the ground. Plyo = hands return; clap = clap mid-air. Prereqs apply.

BANDED ROW (SEATED / STANDING)

Anchor band, sit or stand, pull to ribs. Squeeze shoulder blades. Heavy band as you progress.

BANDED CHEST PRESS

Anchor band behind you, press forward. Variable tension matches force-velocity profile of pressing.

DEAD HANG

Hang from pull-up bar, shoulders active. Grip + decompression. Hockey grip and forearm essential.

— CORE / ANTI-ROTATION

PALLOF PRESS

Heavy band perpendicular to body. Press arms straight out. Resist the rotation pulling you sideways.

BANDED CHOP / LIFT

High-to-low (chop) or low-to-high (lift) diagonal motion. Hips lead, arms follow. Rotational power.

HOLLOW HOLD / ROCK

Small "banana" shape. Lower back glued to floor. Anti-extension core. Gold for posture and shot power.

DRAGON FLAG NEGATIVE

Lie back, lift legs straight up, lower slowly while staying straight. Advanced anti-extension. Block 3.

— PROGRESSION / REGRESSION LIBRARY

SCALE UP. SCALE *down.*

Within an age range of 15-18, athletes span a huge spread of training ages and readiness. For every main exercise, this library gives you a regression (easier) and progression (harder). If a movement breaks down, regress it. If it feels easy, progress it. Stay clean.

SQUAT JUMP REGRESSION BW DROP SQUAT (NO JUMP) PROGRESSION BANDED LOADED JUMP	PUSH-UP REGRESSION INCLINE PUSH-UP (HANDS ELEVATED) PROGRESSION DEFICIT PUSH-UP (HANDS ON BOOKS)

09 — RECOVERY · THE OTHER HALF OF TRAINING

YOU GROW WHEN YOU *recover*.

Training creates the stimulus. Recovery is where the actual adaptation happens. Get the three pillars right and the program works better than you expect. Get one of them wrong and the program gets harder than it has to be — and you stop adapting.

SLEEP	FUEL	WATER
8–10	1.6–2.0	3L+
HOURS / NIGHT	G PROTEIN / KG BODYWEIGHT	PER DAY · MORE IF HOT
At 15–18, you're still growing — bone density, muscle, neural connections all consolidate during sleep. Athletes who sleep less than 8 hours/night recover measurably worse, adapt less, and get injured more often.	Protein at every meal — palm-sized portion minimum. 30g of protein within 60 minutes after every session. Carbs for fuel around training. Vegetables for everything else your body needs to use what you eat.	A 2% drop in hydration drops jump height, sprint speed, and decision speed. Drink half a litre on waking. Sip through training. Pee should be pale yellow. Add electrolytes in heat or after long sessions.
+ Same sleep/wake time every night — including weekends	+ 30g protein at every meal — chicken, fish, eggs, dairy	+ 500ml water on waking, before anything else
+ No screens 30 min before bed — protect melatonin	+ Carbs around training (rice, pasta, oats, fruit)	+ Sip steadily through every training session
+ Cool, dark, quiet room — 18–20°C optimal	+ Half plate vegetables at lunch and dinner	+ Add electrolytes in heat or after Day 4
+ Sunlight in your eyes within an hour of waking	+ Cut soda, energy drinks, and processed sugar	+ Pee should be pale yellow, not clear, not dark

— SIGNS OF OVERTRAINING (PULL BACK IF YOU SEE THESE)

10 — MINDSET / WHAT SEPARATES THE PLAYERS WHO MAKE IT

THE *rules.*

Twelve weeks of structured off-season training is hard. Most kids your age won't do it. The ones who do — who show up four times a week for twelve straight weeks, who treat every rep like it matters — those are the kids you'll be playing alongside at the next level.

These aren't motivational quotes. These are the operating rules every player I've coached at junior, college, and national-team level lives by.

01 SHOW UP ANYWAY

The hardest sessions to start are the ones you don't want to do. Those are the ones that count most. Talent is showing up tired.

02 TRUST THE PROCESS

Some weeks you'll feel like you're getting worse. The numbers at the next test will tell the real story. The body adapts on its schedule, not yours.

03 DETAIL OBSESSED

A clean rep done 48 times beats a sloppy rep done 480 times. Quality is what separates elite athletes in the long run.

04 COMPETE WITH YESTERDAY

Don't compare to other players on Instagram. Compare to the version of yourself from one block ago. That's the only comparison that matters.

05 FALL IN LOVE WITH THE WORK

The players who go furthest aren't the ones who love the games most. They're the ones who love the training. Find the part of this you love. Lean into it.

“The kids who show up four times a week for twelve weeks in their off-seasons are the kids who play in the seasons that matter.”

11 — ABOUT THE COACH

EDU	M.ED. SPORT SCIENCE
EXP	10+ YEARS COACHING
ROLES	HOCKEY PERFORMANCE COACH
TEACHES	PE & SPORT SCIENCE
BRAND	FOUNDER, ELITE HOCKEY DRILLS

— FROM THE COACH

COACH DAVID CIBOCH

**M.ED. SPORT SCIENCE / S&C / NATIONAL TEAM
COACH**

I'm a sport-science coach who has spent the last decade working with hockey players from grassroots through national-team level — including head S&C work with the UAE National Ice Hockey Team. I also work as a Physical Education and Sport Science teacher.

This program is the off-season plan I build for the players I coach in person. Block periodization, hockey-specific transfer, no garbage volume, no fluff. Bodyweight and bands only because those are the limits I work within when I'm building athletes who don't have access to a high-performance facility.

If you take it seriously — four sessions a week, twelve weeks straight, the protocols as written — you'll show up to camp measurably faster, more powerful, and harder to play against. That's the standard.

“The players who train smart between seasons are the players who decide what happens during the seasons.”

— COACH DAVID

[@ELITE_HOCKEY_DRILLS](#) / [ELITEHOCKEYDRILLS.COM](#)

— THE NEXT CHAPTER

YOU FINISHED TWELVE WEEKS. *what's next?*

In-season strength maintenance. Pre-season power retention. Position-specific programming. The work continues all year. Off-season is where you build the engine. In-season is where you protect it.

IN-SEASON MAINTENANCE PROGRAM — COMING NEXT

Two sessions per week. 35 minutes each. Maintains the power and strength you built across these twelve weeks without interfering with on-ice performance. Built for the long competitive season ahead.

COMING SOON · THE ELITE HOCKEY DRILLS APP

228+ hockey-specific exercises across 15 categories. Full structured programs. Video demonstrations for every exercise. Progress tracking. Built specifically for hockey players. Founders pricing available on the waitlist.

*“Be the first to know when the app drops.
Weekly drills, coaching breakdowns, and behind-the-scenes
content.”*
