WELCOME
TO THE PROGRAM

— FROM THE COACH

YOU'RE ABOUT TO SPEND TWELVE WEEKS *building yourself.*

If you did the free 5-day program — welcome back. You already know how this works. If you didn't — that's okay too. This program teaches you everything from the ground up.

Twelve weeks isn't a long time. It's not enough time to become unrecognizable. But it is enough time to become *measurably* better — faster, stronger, more coordinated, more athletic — if you actually do the work.

Four sessions a week. About 35 minutes each. That's it. You don't need a gym. You don't need expensive equipment. You don't need to be talented to start. You just need to show up four times a week and do the work the way it's written.

The program is built in four phases. Foundation. Strength. Power. Peak. Each phase is three weeks long. At the end of each phase, you test. You write down the numbers. You watch them get better.

There will be days you don't feel like training. Do it anyway. There will be days you feel amazing. Don't go harder than the program says — trust the plan. There will be weeks where you don't see progress. The test at the end of the phase will show you the progress was happening the whole time.

Here's the deal: I built this program to be the kind of off-ice training I wish I had when I was your age. Move well. Train smart. Have fun with it. The rest takes care of itself.

— *Coach David*

TRAIN YOUNG. TRAIN *smart.*

Between the ages of 9 and 13, you're in what sport scientists call the "*Train to Train*" window of Long-Term Athletic Development — the years when your body learns athletic patterns faster than at any other point in your life.

The neural wiring you build right now — coordination, balance, speed, body awareness — sticks with you forever. The pros wish they had spent more time on this work at your age. That's not a coaching cliché. It's documented in the LTAD literature across every major sport.

This program is not about chasing heavy weights or grinding through brutal workouts. It's about building the engine. The strength. The speed. The control. The things that make the difference five years from now, when the kids you train with start playing rep hockey.

Twelve weeks. Four phases. Movement quality before everything else.

01

QUALITY OVER QUANTITY

Every rep is a chance to teach your body a pattern it will use for ten years. We move well before we move fast. If a rep is ugly, slow it down.

02

PROGRESSION, NOT PUNISHMENT

Each phase builds on the last. Volume and complexity rise on a curve your body can actually adapt to. Training shouldn't leave you wrecked — it should leave you better.

03

MEASURE EVERYTHING

Tests every three weeks. You write down the numbers. The program proves itself in your own handwriting.

"Twelve weeks of patient, well-coached work beats two years of random hard training."

THE 12-WEEK *map.*

Four phases, three weeks each. Every phase has a job. Every phase ends with a test that proves the work worked.

PHASE 01 FOUNDATION

WEEKS 01 — 03

Movement quality.
Bodyweight mastery. The
patterns you'll use for every
workout after this one.

"Move well first."

PHASE 02 STRENGTH

WEEKS 04 — 06

Light dumbbells. Resistance
bands. Single-leg work.
Real load, controlled tempo,
hockey-relevant strength.

"Build the frame."

PHASE 03 POWER

WEEKS 07 — 09

Plyometrics. Speed.
Eccentric work. Turning the
strength you built into
explosive, hockey-ready
power.

"Move fast on purpose."

PHASE 04 PEAK

WEEKS 10 — 12

Integration. Complex
combinations. The full
combine test. Twelve
weeks of work, on display.

"Put it all together."

THE WEEKLY RHYTHM

FOUR DAYS. ONE REST DAY MINIMUM IN THE MIDDLE.

DAY A

Lower Body — strength,
single-leg, glute focus

DAY B

Upper & Core — push, pull,
anti-rotation, anti-extension

DAY C

Speed & Quickness —
acceleration, change of
direction, plyo

DAY D

Integration — carries,
complexes, full-body hockey
patterns

FOLLOW THE PLAN. TRUST THE *process.*

Each week page in this program shows all four of that week's sessions on a single page — Day A, B, C, D. You open the PDF, find your week, do the workout listed for the day, write down anything you want to remember, and close it. That's the whole experience.

01 ORDER OF DAYS

Do the sessions in order: A → B → C → D. The order matters — it spreads stress across your body the right way.

02 SPACING

Leave at least one rest day in the middle of the week. Most kids do A on Monday, B Tuesday, rest Wed, C Thursday, D Friday or Saturday.

03 ALWAYS WARM UP

Every single session starts with the Universal Warm-Up (page 7). Five minutes. Non-negotiable.

04 TEMPO IS PART OF THE REP

A 3-1-1-0 tempo means 3s down, 1s pause, 1s up, 0s rest at top. The tempo is the work — don't speed through it.

05 REST PROPERLY

Rest times exist for a reason. On strength days, rest is full. On speed days, rest is FULL — speed isn't about being tired.

06 TEST WEEK = TEST WEEK

At the end of each phase you test. Record the numbers. The numbers don't lie. The numbers don't argue. They just tell you what's working.

HOW EACH EXERCISE READS

01 GOBLET SQUAT

the lift

3 × 8

sets × reps

3-1-1-0

tempo

60s rest

between sets

"chest tall, knees out"

the cue

Each session lists 5 exercises plus the warm-up. Total session time, including warm-up and cool-down, is about 35 minutes. Some sessions are quicker, some are longer — never more than 45.

THE *kit.*

Three pieces of equipment. About \$30–50 total. You'll use these for the entire twelve weeks and every program you do after. Buy once, use forever.

ITEM 01

RESISTANCE BAND LOOP

LIGHT TO MEDIUM • MINI-BAND STYLE

A simple loop band, the kind that goes around your knees or ankles. Used for glute activation, lateral work, hip strength, and band rows. One band is enough for the whole program.

"Get the fabric kind if you can — it doesn't roll up or pinch the skin."

ITEM 02

LIGHT DUMBBELLS

PAIR • 2–5KG EACH (5–10 LBS)

A pair of light dumbbells. We're not chasing heavy weights — these are for movement quality and adding just enough load to make patterns count. Start light. You can borrow these or even use heavy water bottles to start.

"If you only have one weight, go lighter — never heavier. Quality first."

ITEM 03

JUMP ROPE

ANY KIND • SIZED TO YOUR HEIGHT

A basic jump rope. Used for conditioning, calf strength, ankle stiffness, and rhythm. Stand on the middle of the rope — the handles should reach your armpits. That's the right length.

"A speed rope is great. A \$5 plastic rope works fine too."

ITEM 04

A LITTLE SPACE

3M × 3M • FLOOR OR GRASS

You need a clear space about the size of a small bedroom — three meters by three meters. Hardwood, tile, or short grass all work. For Day C (speed), a slightly bigger open area helps but isn't required.

"Outside is a bonus on speed days — fresh air helps."

OPTIONAL A box or sturdy bench knee-height or lower (for step-ups in Phase 2 onward). A small towel for cool-downs. A water bottle. A notebook to write down your test scores.

THE *warm-up.*

Five minutes. Four movements. Every single session of the next twelve weeks starts here. The warm-up wakes your nervous system up, prepares your joints, and turns on the muscles you're about to ask to work hard. Skip it once, you'll get away with it. Skip it often, you'll get hurt.

01 SPIDER LUNGE WITH ROTATION

2 ROUNDS × 4 EACH SIDE

"Open the hip. Open the chest."

Push-up position. Step your right foot up beside your right hand. Reach the right arm up to the ceiling and follow it with your eyes. Place the hand back down, step back, switch sides. Slow, controlled, big range.

OPENS Hips, t-spine, shoulders. The three places hockey tightens you up.

02 INCHWORM TO PUSH-UP

2 ROUNDS × 4 REPS

"Whole body, every rep."

Stand tall. Bend forward and walk your hands out into a push-up position. Do one controlled push-up (knees down is okay). Walk your hands back to your feet. Stand up. Repeat.

ACTIVATES Shoulders, core, hamstrings — your whole posterior chain warms up at once.

03 LATERAL SQUAT SHIFT

2 ROUNDS × 5 EACH SIDE

"Sink into one hip at a time."

Stand wide, feet pointing forward. Shift your weight over your right leg, bending the right knee and keeping the left leg straight. Sink as deep as you can. Pause. Shift to the other side without standing up.

OPENS Hips and groin. Builds the lateral mobility skating demands.

04 A-SKIP IN PLACE

2 ROUNDS × 20 SECONDS

"Tall and bouncy. Light feet."

Skip in place. Drive the front knee high. Pump the opposite arm. Land soft on the ball of your foot. Stay tall through the chest. This is not jogging — it's bouncy and athletic.

WAKES UP Your nervous system. Gets the legs ready to be fast.

THE *cool-down.*

Three minutes. Three movements. The cool-down is how you teach your body to switch off after training. Skipping the cool-down won't ruin a workout — but doing it consistently makes everything else work better. Recovery starts the moment training ends.

01 SLOW WALK WITH NOSE BREATHING

60 SECONDS

"In through the nose. Out through the nose."

Walk slowly. Breathe in and out through your nose only — no mouth breathing. Long, slow breaths. This tells your nervous system that the hard part is over.

SHIFTS You from training mode to recovery mode. Heart rate drops. Body starts repairing.

02 CHILD'S POSE WITH BREATH

60 SECONDS

"Long exhales. Drop the shoulders."

Knees apart, big toes touching. Sit back on your heels. Arms long in front of you, forehead on the floor. Breathe in for 4 seconds. Breathe out for 6 seconds. Repeat for a full minute.

RELEASES Lower back, shoulders, and the breath you've been holding without realizing it.

03 LEGS UP THE WALL (OR SHIN PULL)

60 SECONDS

"Heavy legs. Quiet mind."

Lie on your back. Either put your legs straight up against a wall, or pull your shins gently to your chest with your arms. Breathe. Notice how your body feels. This is where the work locks in.

RESTORES Circulation. Calms the nervous system. Begins the recovery process before you even stand up.

00

THE BASELINE

test.

Before Week 1, Day A — you test. This is your starting line. Six tests, written down, signed and dated. You will retest at the end of every phase and the numbers will change. Twelve weeks from now, you'll come back to this page and look at how far you've come. Be honest. Be precise. The point isn't to be impressive — the point is to be real.

01 BROAD JUMP — MAX

Three attempts. Best counts. Standing start. Measure heel-to-line on landing.

02 30-SEC SHUTTLE

Two markers 20m apart. 30 seconds of continuous touches. Count every line touch.

03 PUSH-UPS / 60 SEC

Max quality push-ups in 60 seconds (knees down version is allowed — note which one).

04 PLANK HOLD — MAX

Forearm plank. Straight line head to heels. Time stops on form break.

05 SL BALANCE — EYES CLOSED

One foot, eyes closed, hands on hips. Test both legs. Time stops when foot lands.

06 DEEP SQUAT HOLD

Bottom of a deep squat, heels flat. Time stops when heels lift or you stand up.

YOUR BASELINE

MY GOAL AT WEEK 12 _____

— PHASE ZERO ONE

01

FIRST THREE WEEKS

FOUND-
ation.

"Before you can train hard, you have to train well.

This is where we learn how."

Phase 1 is the most important phase of the program — even though it might feel like the least intense.

For three weeks, we're going to drill the five fundamental movement patterns: squat, hinge, lunge, push, and pull. We'll teach your body what a good rep feels like, and we'll teach your brain what a clean movement looks like. We're going to do this with bodyweight and a single resistance band — that's it.

By the end of Week 3, your squat will be deeper. Your push-up will be cleaner. Your single-leg balance will be steadier. These are the foundations every harder thing in Phases 2, 3, and 4 will be built on.

WEEKS 01 — 03 • 12 SESSIONS

FOCUS MOVEMENT QUALITY**EQUIPMENT** BODYWEIGHT + BAND

— PHASE FOCUS

Movement quality over load. Slow tempos. Pause reps. Clean technique on every single rep, every single set. If a rep is ugly, drop the difficulty and reset.

— FIRST WEEK. SET THE PATTERN.

WEEK 01

01 / 12
FOUNDATION

Movement learning week. Every rep is a teaching rep. Don't worry about being tired — worry about being clean.

DAY A	LOWER FOUNDATION	DAY B	UPPER & CORE
01 BODYWEIGHT SQUAT <i>tempo 3-1-1-0, knees out</i>	3 x 8	01 PUSH-UP <i>straight line, knees OK</i>	3 x 6
02 GLUTE BRIDGE <i>2s hold at top, drive heels</i>	3 x 10	02 BAND PULL-APART <i>squeeze shoulder blades</i>	3 x 10
03 REVERSE LUNGE <i>slow down, controlled return</i>	2 x 6 ea	03 BEAR CRAWL <i>hips low, don't spill water</i>	3 x 5m
04 DEAD BUG <i>low back glued to floor</i>	2 x 8 ea	04 SIDE PLANK <i>stack hips, straight line</i>	2 x 15s ea
05 HOLLOW HOLD <i>small banana shape</i>	3 x 15s	05 INCHWORM <i>long arms, tight middle</i>	2 x 4
~ 30 MIN	WARM-UP + COOL-DOWN	~ 30 MIN	WARM-UP + COOL-DOWN

DAY C	SPEED & QUICKNESS	DAY D	INTEGRATION & PLAY
01 WALL DRIVE HOLD <i>straight body, drive knee up</i>	4 x 5s ea	01 FARMER CARRY <i>tall posture, shoulders down</i>	3 x 20m
02 LATERAL SHUFFLE <i>stay low, feet never cross</i>	5 x 5m	02 SL BALANCE — EYES OPEN <i>soft knee, small wobbles OK</i>	2 x 20s ea
03 A-SKIP MOVING <i>tall, bouncy, knees up</i>	3 x 10m	03 SKATER HOP — STICK IT <i>freeze the landing 2 sec</i>	3 x 4 ea
04 REACTIVE 5M SPRINT <i>from different start positions</i>	6 x 5m	04 SQUAT HOLD <i>deep, heels flat, breathe</i>	3 x 20s
05 JUMP ROPE — STEADY <i>soft contacts, quick wrists</i>	3 x 30s	05 MIRROR GAME OR FREE PLAY <i>react, don't think</i>	5 min
~ 30 MIN	FULL REST BETWEEN SPRINTS	~ 35 MIN	HAVE FUN ON DAY D

— VOLUME BUMP. SAME PATTERNS.

WEEK 02

02 / 12
FOUNDATION

Same moves, more reps. Your body knows the patterns now — we're going to build endurance in the right positions.

DAY A	LOWER FOUNDATION	DAY B	UPPER & CORE
01 BODYWEIGHT SQUAT <i>tempo 3-1-1-0, deeper than week 1</i>	3 x 10	01 PUSH-UP <i>slower lower, full range</i>	3 x 8
02 GLUTE BRIDGE <i>3s hold at top</i>	3 x 12	02 BAND PULL-APART <i>2s hold at full pull</i>	3 x 12
03 REVERSE LUNGE <i>control the drop</i>	2 x 8 ea	03 BEAR CRAWL <i>slower and lower than week 1</i>	3 x 7m
04 DEAD BUG <i>slower than last week</i>	2 x 10 ea	04 SIDE PLANK <i>longer hold, same form</i>	2 x 20s ea
05 HOLLOW HOLD <i>breathe through it</i>	3 x 20s	05 INCHWORM <i>controlled, no rushing</i>	2 x 5
~ 32 MIN	SAME REST AS WEEK 01	~ 32 MIN	WARM-UP + COOL-DOWN

DAY C	SPEED & QUICKNESS	DAY D	INTEGRATION & PLAY
01 WALL DRIVE HOLD <i>push the wall, drive harder</i>	4 x 6s ea	01 FARMER CARRY <i>add light DBs if you have them</i>	3 x 25m
02 LATERAL SHUFFLE <i>low athletic stance</i>	5 x 7m	02 SL BALANCE — EYES OPEN <i>stretch the hold</i>	2 x 30s ea
03 A-SKIP MOVING <i>bigger range, light feet</i>	3 x 15m	03 SKATER HOP — STICK IT <i>2s landing pause</i>	3 x 5 ea
04 REACTIVE 5M SPRINT <i>explode out, walk back</i>	6 x 7m	04 SQUAT HOLD <i>deeper, longer</i>	3 x 25s
05 JUMP ROPE — STEADY <i>quiet feet</i>	3 x 45s	05 MIRROR / TAG / FREE PLAY <i>compete</i>	7 min
~ 32 MIN	FULL REST BETWEEN SPRINTS	~ 37 MIN	HAVE FUN ON DAY D

— LAST FOUNDATION WEEK. BUILD TO THE TEST.

WEEK 03

03 / 12
FOUNDATION

Peak volume for Phase I. You should feel strong and clean. Phase test comes after Day D.

DAY A	LOWER FOUNDATION	DAY B	UPPER & CORE
01 BODYWEIGHT SQUAT <i>peak volume, peak quality</i>	3 × 12	01 PUSH-UP <i>try toes if you've been on knees</i>	3 × 8–10
02 GLUTE BRIDGE <i>3s hold at top</i>	3 × 15	02 BAND PULL-APART <i>peak volume</i>	3 × 15
03 REVERSE LUNGE <i>add 3rd set</i>	3 × 8 ea	03 BEAR CRAWL <i>slowest of the phase</i>	3 × 10m
04 DEAD BUG <i>3 sets now, control over speed</i>	3 × 8 ea	04 SIDE PLANK <i>longest hold</i>	2 × 25s ea
05 HOLLOW HOLD <i>final hollow of the phase</i>	3 × 25s	05 INCHWORM <i>final inchworm reps</i>	2 × 6
~ 35 MIN	WARM-UP + COOL-DOWN	~ 35 MIN	WARM-UP + COOL-DOWN

DAY C	SPEED & QUICKNESS	DAY D	INTEGRATION & PLAY
01 WALL DRIVE HOLD <i>5 sets, peak effort</i>	5 × 5s ea	01 FARMER CARRY <i>slow walk, tall chest</i>	3 × 30m
02 LATERAL SHUFFLE <i>6 sets, peak quickness</i>	6 × 7m	02 SL BALANCE — EYES OPEN <i>3 sets now</i>	3 × 25s ea
03 A-SKIP MOVING <i>peak distance, light feet</i>	3 × 20m	03 SKATER HOP — STICK IT <i>freeze every landing</i>	3 × 6 ea
04 REACTIVE 5M SPRINT <i>8 starts, full recovery</i>	8 × 5m	04 SQUAT HOLD <i>final, deep, breathe</i>	3 × 30s
05 JUMP ROPE — STEADY <i>full minute, clean rhythm</i>	3 × 60s	05 FREE PLAY OR GAME <i>peak fun day</i>	10 min
~ 35 MIN	FULL REST BETWEEN SPRINTS	~ 40 MIN	TEST IS NEXT

T1

— END OF PHASE 01 / FOUNDATION

PHASE TEST

number one.

Done the three weeks. Now you test. Do The Warm-Up twice today. Full rest between tests. You're not trying to be tired — you're trying to be your best. Compare to your Day Zero baseline. Most kids see clear improvement in 3–5 of these already. That's the foundation working.

01 BROAD JUMP — MAX

3 attempts. Best counts. Goal: beat baseline by 3–6 cm.

02 30-SEC SHUTTLE

Same protocol as Day Zero. Touch every line.

03 PUSH-UPS / 60 SEC

Same version as baseline. Quality reps only.

04 PLANK HOLD — MAX

Forearm plank. Strict form. Time stops on break.

05 SL BALANCE — EYES CLOSED

Both legs. Hands on hips, eyes closed.

06 DEEP SQUAT HOLD

Deepest possible. Heels flat. Hold to fail.

PHASE 01 SCORECARD

VS DAY ZERO

TEST	DAY ZERO	PHASE 01	CHANGE
BROAD JUMP	___ cm	___ cm	+ ___
SHUTTLE TOUCHES	___	___	+ ___
PUSH-UPS (60S)	___	___	+ ___
PLANK HOLD	___	___	+ ___
BALANCE L / R	___ / ___	___ / ___	+ ___
DEEP SQUAT HOLD	___	___	+ ___

— PHASE ZERO TWO

02

SECOND THREE WEEKS

STR-
ength.

*"Now we add load. Carefully.
Tempo first. Numbers second."*

You've spent three weeks teaching your body the patterns. Now we add weight to them.

The dumbbells stay light. The bands stay light. This phase isn't about how much you can lift — it's about how cleanly you can move under load. Goblet squats. Single-leg RDLs. Band rows. Pallof presses. The lifts of every great hockey program.

If your form starts to break, drop the weight. The strongest hockey players you've ever seen got there by being patient with this phase first.

— PHASE FOCUS

Controlled tempo on every loaded rep. Single-leg work introduced. Pulling matches pushing volume. Anti-rotation core work begins.

WEEKS 04 — 06 • 12 SESSIONS

FOCUS STRENGTH UNDER CONTROL**EQUIPMENT** LIGHT DBS, BAND, JUMP ROPE

— INTRODUCING THE LOAD

WEEK 04

04 / 12
STRENGTH

First week with light dumbbells and the band. Form before weight, always. If a rep is ugly, drop the load.

DAY A	LOWER STRENGTH	DAY B	UPPER STRENGTH
01	GOBLET SQUAT (light DB) <i>tempo 3-1-1-0, chest tall</i>	01	DB FLOOR PRESS <i>elbows 45°, slow lower</i>
02	DB RDL <i>hips back, soft knees</i>	02	BAND ROW <i>squeeze blades, slow return</i>
03	WALKING LUNGE <i>long stride, knee aligned</i>	03	DB PUSH-UP TO ROW <i>hips stable, no swing</i>
04	BAND GLUTE BRIDGE <i>band above knees, push out</i>	04	PLANK SHOULDER TAP <i>hips quiet, slow taps</i>
05	PALLOF PRESS (band) <i>resist the rotation</i>	05	DB SUITCASE CARRY <i>one DB, don't lean</i>
~ 35 MIN	60S REST BETWEEN SETS	~ 35 MIN	60S REST BETWEEN SETS

DAY C	SPEED & PLYO	DAY D	INTEGRATION
01	BAND-RESISTED START <i>drive low, push the ground</i>	01	FARMER + SUITCASE COMPLEX <i>20m each, 3 rounds</i>
02	LATERAL BOUND <i>stick the landing 2 sec</i>	02	BEAR CRAWL WITH DBs <i>very slow, hips low</i>
03	A-SKIP RESISTED <i>light band, tall posture</i>	03	SL DB RDL <i>stick the bottom, one DB</i>
04	BOX STEP-UP (DBs) <i>drive through the heel</i>	04	HOLLOW HOLD <i>peak contraction, breathe</i>
05	JUMP ROPE — INTERVALS <i>30s on, 30s off</i>	05	FREE PLAY / GAME <i>compete, have fun</i>
~ 35 MIN	FULL REST BETWEEN SPRINTS	~ 35 MIN	HAVE FUN ON DAY D

— SAME LIFTS. MORE VOLUME.

WEEK 05

05 / 12
STRENGTH

Form is locked in. Now we add reps. Same load if it feels right, slightly heavier if last week felt easy.

DAY A	LOWER STRENGTH	DAY B	UPPER STRENGTH
01	GOBLET SQUAT (light DB) <i>tempo 3-1-1-0, deeper</i>	01	DB FLOOR PRESS <i>controlled lower 3 sec</i>
02	DB RDL <i>slower eccentric</i>	02	BAND ROW <i>peak squeeze, slow return</i>
03	WALKING LUNGE <i>pause at bottom 1s</i>	03	DB PUSH-UP TO ROW <i>5 each side</i>
04	BAND GLUTE BRIDGE <i>2s hold at top</i>	04	PLANK SHOULDER TAP <i>10 each, hips quiet</i>
05	PALLOF PRESS (band) <i>3s holds at full press</i>	05	DB SUITCASE CARRY <i>longer walk, stay tall</i>
~ 37 MIN	60S REST BETWEEN SETS	~ 37 MIN	60S REST BETWEEN SETS

DAY C	SPEED & PLYO	DAY D	INTEGRATION
01	BAND-RESISTED START <i>7m sprints, full recovery</i>	01	CARRY COMPLEX <i>farmer + suitcase + overhead</i>
02	LATERAL BOUND <i>further distance, stick landing</i>	02	BEAR CRAWL WITH DBs <i>slower, longer crawl</i>
03	A-SKIP RESISTED <i>longer reps, light feet</i>	03	SL DB RDL <i>8 each, balanced</i>
04	BOX STEP-UP (DBs) <i>8 each leg, controlled</i>	04	HOLLOW HOLD <i>30s, no breaks</i>
05	JUMP ROPE — INTERVALS <i>45s on, 30s off</i>	05	FREE PLAY / GAME <i>compete</i>
~ 37 MIN	FULL REST BETWEEN SPRINTS	~ 40 MIN	HAVE FUN ON DAY D

— PEAK STRENGTH VOLUME

WEEK 06

06 / 12
STRENGTH

Top of the phase. Highest volume of the strength block. Test is right after this week — you should feel ready.

DAY A

LOWER STRENGTH

01

GOBLET SQUAT (light DB)
peak quality, 4 sets

4 × 8

02

DB RDL
12 reps, slow eccentric

3 × 12

03

WALKING LUNGE
add 3rd set

3 × 8 ea

04

BAND GLUTE BRIDGE
15 reps, full lockout

3 × 15

05

PALLOF PRESS (band)
3 sets now, 8 each

3 × 8 ea

~ 40 MIN

60S REST BETWEEN SETS

DAY B

UPPER STRENGTH

01

DB FLOOR PRESS
10 reps clean

3 × 10

02

BAND ROW
15 reps, full squeeze

3 × 15

03

DB PUSH-UP TO ROW
3 sets now

3 × 5 ea

04

PLANK SHOULDER TAP
add 3rd set

3 × 8 ea

05

DB SUITCASE CARRY
longest carry, tall

3 × 30m

~ 40 MIN

60S REST BETWEEN SETS

DAY C

SPEED & PLYO

01

~ 42 MIN

TEST IS NEXT

T2

— END OF PHASE 02 / STRENGTH

PHASE TEST
number two.

Halfway point. You're a different athlete than the kid who started six weeks ago. Same six tests as before. Compare against Phase 01. Expect big gains on plank, push-ups, and squat hold. Broad jump and shuttle improve from here on out.

01 BROAD JUMP — MAX

3 attempts. Best counts. Goal: beat Phase 01 by 2–5 cm.

02 30-SEC SHUTTLE

Same protocol. Speed should be noticeably better.

03 PUSH-UPS / 60 SEC

Try toes if you've been on knees.

04 PLANK HOLD — MAX

Forearm plank. Time stops on break.

05 SL BALANCE — EYES CLOSED

Both legs. Hands on hips, eyes closed.

06 DEEP SQUAT HOLD

Deepest, heels flat. Hold to fail.

PHASE 02 SCORECARD

VS PHASE 01

TEST	PHASE 01	PHASE 02	CHANGE
BROAD JUMP	___ cm	___ cm	+ ___
SHUTTLE TOUCHES	___	___	+ ___
PUSH-UPS (60S)	___	___	+ ___
PLANK HOLD	___	___	+ ___
BALANCE L / R	___ / ___	___ / ___	+ ___
DEEP SQUAT HOLD	___	___	+ ___

— PHASE ZERO THREE

03

THIRD THREE WEEKS

POWER.
explosive.

*"Strength becomes speed.
Now we move fast on purpose."*

You built the engine. Now we tune it. Phase 3 is where strength turns into the explosive power hockey actually demands.

Jump squats. Plyometric push-ups. Lateral bounds. Skater hops. The exercises change but the rule stays the same: every single rep is intentional. Plyometrics done well are gold. Plyometrics done sloppy will hurt you.

This is the most fun phase. It's also the phase where most kids try to skip the warm-up. Don't skip the warm-up.

— PHASE FOCUS

Maximum intent on every rep. Full rest between explosive sets. Plyo volume is low by design — quality is everything.

WEEKS 07 — 09 • 12 SESSIONS

FOCUS EXPLOSIVE POWER**EQUIPMENT** LIGHT DBS, BAND, JUMP ROPE, BOX

— PLYO INTRODUCTION

WEEK 07

07 / 12
POWER

Low volume, high intent. Every jump is a max-effort jump. Every sprint is full speed. Rest fully.

DAY A	LOWER POWER	DAY B	UPPER POWER
01 JUMP SQUAT <i>soft land, reset every rep</i>	3 x 5	01 PLYO PUSH-UP (knees) <i>push hard, hands leave floor</i>	3 x 4
02 BULGARIAN SPLIT SQUAT <i>rear foot elevated, control</i>	3 x 6 ea	02 BAND PULL-APART SPEED <i>fast pull, slow return</i>	3 x 10
03 BROAD JUMP <i>max distance, stick landing</i>	5 reps	03 DB PUSH PRESS <i>drive from legs, finish overhead</i>	3 x 5
04 SL RDL (bodyweight) <i>6 each, balance focus</i>	2 x 6 ea	04 HOLLOW ROCK <i>small range, controlled</i>	3 x 8
05 DEAD BUG WITH DB <i>DB held above chest</i>	2 x 8 ea	05 RENEGADE ROW <i>hips quiet, alt sides</i>	2 x 4 ea
~ 35 MIN	FULL REST BETWEEN JUMPS	~ 35 MIN	60S REST BETWEEN SETS

DAY C	MAX SPEED	DAY D	HOCKEY INTEGRATION
01 FALLING START SPRINT <i>fall forward, catch with sprint</i>	6 x 10m	01 SKATER HOP COMPLEX <i>3 hops, stick the last</i>	3 rounds
02 LATERAL SKATER BOUND <i>distance + stick</i>	3 x 4 ea	02 DB GOBLET LATERAL LUNGE <i>sit into the hip</i>	2 x 6 ea
03 CROSSOVER STEP <i>snap the hips</i>	3 x 4 ea	03 SL BOX STEP-DOWN <i>touch heel, slow control</i>	2 x 5 ea
04 POGO HOPS <i>stiff ankles, quick bounce</i>	3 x 15	04 HOLLOW HOLD <i>peak phase, 35s</i>	3 x 35s
05 REACTIVE MIRROR SPRINT <i>react, don't anticipate</i>	4 x 10s	05 BATTLE GAME / 1v1 <i>small space, compete</i>	10 min
~ 35 MIN	FULL REST BETWEEN SPRINTS	~ 40 MIN	HAVE FUN ON DAY D

— VOLUME BUMP. SAME INTENT.

WEEK 08

08 / 12
POWER

Same exercises. Slightly more volume. Don't sacrifice quality for quantity. Plyos still go max effort or not at all.

DAY A	LOWER POWER	DAY B	UPPER POWER
01 JUMP SQUAT <i>6 reps, max effort</i>	3 × 6	01 PLYO PUSH-UP (knees) <i>5 reps, peak push</i>	3 × 5
02 BULGARIAN SPLIT SQUAT <i>8 each, controlled</i>	3 × 8 ea	02 BAND PULL-APART SPEED <i>12 fast reps</i>	3 × 12
03 BROAD JUMP <i>6 reps total, full recovery</i>	6 reps	03 DB PUSH PRESS <i>6 reps, drive hard</i>	3 × 6
04 SL RDL (bodyweight) <i>8 each, slower tempo</i>	2 × 8 ea	04 HOLLOW ROCK <i>10 reps controlled</i>	3 × 10
05 DEAD BUG WITH DB <i>add 3rd set</i>	3 × 8 ea	05 RENEGADE ROW <i>5 each side</i>	2 × 5 ea
~ 37 MIN	FULL REST BETWEEN JUMPS	~ 37 MIN	60S REST BETWEEN SETS

DAY C	MAX SPEED	DAY D	HOCKEY INTEGRATION
01 FALLING START SPRINT <i>15m, longer accel</i>	6 × 15m	01 SKATER HOP COMPLEX <i>4 rounds, max distance</i>	4 rounds
02 LATERAL SKATER BOUND <i>6 each, peak distance</i>	3 × 6 ea	02 DB GOBLET LATERAL LUNGE <i>8 each, deeper</i>	2 × 8 ea
03 CROSSOVER STEP <i>5 each, snap hips</i>	3 × 5 ea	03 SL BOX STEP-DOWN <i>6 each, slow eccentric</i>	2 × 6 ea
04 POGO HOPS <i>20 reps, stiff ankles</i>	3 × 20	04 HOLLOW HOLD <i>40s peak</i>	3 × 40s
05 REACTIVE MIRROR SPRINT <i>15s rounds</i>	4 × 15s	05 BATTLE GAME / 1v1 <i>compete hard</i>	12 min
~ 37 MIN	FULL REST BETWEEN SPRINTS	~ 42 MIN	HAVE FUN ON DAY D

— PEAK POWER WEEK

WEEK 09

09 / 12
POWER

Highest volume of the power phase. Sets up Phase 3 test. You should feel explosive.

DAY A	LOWER POWER	DAY B	UPPER POWER
01 JUMP SQUAT <i>4 sets, 5 reps each</i>	4 × 5	01 PLYO PUSH-UP (knees) <i>6 reps, max push</i>	3 × 6
02 BULGARIAN SPLIT SQUAT <i>10 each leg</i>	3 × 10 ea	02 BAND PULL-APART SPEED <i>15 reps, fast</i>	3 × 15
03 BROAD JUMP <i>8 reps, peak distance</i>	8 reps	03 DB PUSH PRESS <i>8 reps, peak load</i>	3 × 8
04 SL RDL (bodyweight) <i>3 sets, 6 each</i>	3 × 6 ea	04 HOLLOW ROCK <i>12 reps</i>	3 × 12
05 DEAD BUG WITH DB <i>10 each, peak</i>	3 × 10 ea	05 RENEGADE ROW <i>3 sets, 5 each</i>	3 × 5 ea
~ 40 MIN	FULL REST BETWEEN JUMPS	~ 40 MIN	60S REST BETWEEN SETS

DAY C	MAX SPEED	DAY D	HOCKEY INTEGRATION
01 FALLING START SPRINT <i>8 sprints, full rest</i>	8 × 10m	01 SKATER HOP COMPLEX <i>peak power, 4 rounds</i>	4 rounds
02 LATERAL SKATER BOUND <i>8 each, peak</i>	3 × 8 ea	02 DB GOBLET LATERAL LUNGE <i>6 each, 3 sets</i>	3 × 6 ea
03 CROSSOVER STEP <i>6 each side</i>	3 × 6 ea	03 SL BOX STEP-DOWN <i>5 each, 3 sets</i>	3 × 5 ea
04 POGO HOPS <i>25 reps stiff</i>	3 × 25	04 HOLLOW HOLD <i>peak — 45s</i>	3 × 45s
05 REACTIVE MIRROR SPRINT <i>5 rounds, 15s</i>	5 × 15s	05 BATTLE GAME / 1v1 <i>peak competition</i>	12 min
~ 40 MIN	FULL REST BETWEEN SPRINTS	~ 42 MIN	TEST IS NEXT

T3

— END OF PHASE 03 / POWER

PHASE TEST
number three.

Power phase complete. This test is where the broad jump and shuttle numbers usually take their biggest jump. The plyometric and speed work you did the last three weeks is now visible in actual measurements. Compare against your last test. The numbers prove the work worked.

01 BROAD JUMP — MAX

3 attempts. Best counts. Expect 5–10cm gain from Phase 02.

02 30-SEC SHUTTLE

Same protocol. Expect 2–4 more touches.

03 PUSH-UPS / 60 SEC

Quality reps. Toes if possible.

04 PLANK HOLD — MAX

Forearm plank, strict form.

05 SL BALANCE — EYES CLOSED

Both legs, hands on hips.

06 DEEP SQUAT HOLD

Deepest, heels flat. Hold to fail.

PHASE 03 SCORECARD

VS PHASE 02

TEST	PHASE 02	PHASE 03	CHANGE
BROAD JUMP	___ cm	___ cm	+ ___
SHUTTLE TOUCHES	___	___	+ ___
PUSH-UPS (60S)	___	___	+ ___
PLANK HOLD	___	___	+ ___
BALANCE L / R	___ / ___	___ / ___	+ ___
DEEP SQUAT HOLD	___	___	+ ___

— PHASE ZERO FOUR

04

FINAL THREE WEEKS

PEAK.
all of it.

*"Twelve weeks of work meets the test.
This is what we trained for."*

Phase 4 is where everything you learned over the last nine weeks comes together. Complex movements. Combinations. Real hockey-specific integration.

The exercises in this phase are harder — but you can handle them now because you've earned them. Clap push-ups. Bulgarian split squats with dumbbells. Multi-directional bounding. This is the level of training high school hockey players are doing.

At the end of Week 12, you take The Combine. Six tests, full effort, written down. You'll see twelve weeks of work on a single page. That's the moment this whole program was built for.

WEEKS 10 — 12 • 12 SESSIONS

FOCUS INTEGRATION / COMBINE PROGRAM

EQUIPMENT FULL KIT

— PHASE FOCUS

Complex integration. Hockey-specific combinations.

Test prep mindset — every session is rehearsal for the combine.

PHASE 04 — PEAK

— INTEGRATION BEGINS

WEEK10

10 / 12
PEAK

Complex movements introduced. Combinations of patterns you've trained for nine weeks. Quality first, always.

DAY A	COMPLEX LOWER
01	SQUAT TO TUCK JUMP <i>3 squats then 1 jump</i> 3 x 5
02	DB BULGARIAN SPLIT SQUAT <i>light DBs, controlled</i> 3 x 6 ea
03	BROAD JUMP → SPRINT 10M <i>land and explode forward</i> 5 reps
04	SL GLUTE BRIDGE (band) <i>band above knees</i> 3 x 8 ea
05	SUITCASE GET-UP <i>DB in one hand, stand fully</i> 2 x 3 ea
~ 38 MIN FULL REST BETWEEN COMPLEXES	

DAY B	COMPLEX UPPER
01	CLAP PUSH-UP (or hard plyo) <i>knees if needed</i> 3 x 4
02	DB THRUSTER <i>squat + press, full chain</i> 3 x 6
03	PLANK TO PUSH-UP <i>elbows to hands, alt</i> 3 x 6 ea
04	HANGING / BAR HOLD <i>dead hang, breathe</i> 3 x 15s
05	SIDE PLANK WITH REACH <i>thread the needle</i> 2 x 6 ea
~ 38 MIN 60S REST BETWEEN SETS	

DAY C	PEAK SPEED
01	RESISTED → FREE SPRINT <i>band off, explode</i> 5 x 10m
02	MULTI-DIRECTION BOUND <i>forward, lateral, diagonal</i> 3 x 4 ea
03	HEIDEN (max lateral jump) <i>furthest possible, stick</i> 5 reps
04	MIRROR SPRINT GAME <i>20s rounds, full effort</i> 4 x 20s
05	JUMP ROPE — SPEED <i>60s as fast as possible</i> 3 x 60s
~ 38 MIN FULL REST BETWEEN SPRINTS	

DAY D	PEAK INTEGRATION
01	COMBINE CIRCUIT <i>2 rounds, all 6 tests</i> 2 rounds
02	DB COMPLEX <i>RDL + row + squat + press</i> 3 rounds
03	SPEED LADDER EQUIV <i>fast feet pattern</i> 3 rounds
04	HOLLOW HOLD <i>peak — 50s</i> 3 x 50s
05	FREE PLAY WITH INTENT <i>imagine game scenarios</i> 10 min
~ 42 MIN HAVE FUN ON DAY D	

— PEAK OUTPUT. TEST APPROACHES.

WEEK 11

11 / 12
PEAK

Same complex work, more volume. Last hard week before the final test. You should feel like a different athlete than 11 weeks ago.

DAY A	COMPLEX LOWER
01	SQUAT TO TUCK JUMP <i>6 reps per set</i> 3 × 6
02	DB BULGARIAN SPLIT SQUAT <i>8 each leg</i> 3 × 8 ea
03	BROAD JUMP → SPRINT 10M <i>6 reps, peak</i> 6 reps
04	SL GLUTE BRIDGE (band) <i>10 each, 2s hold</i> 3 × 10 ea
05	SUITCASE GET-UP <i>4 each, slow stand</i> 2 × 4 ea
~ 40 MINFULL REST BETWEEN COMPLEXES	

DAY B	COMPLEX UPPER
01	CLAP PUSH-UP (or hard plyo) <i>5 reps, max push</i> 3 × 5
02	DB THRUSTER <i>8 reps, full chain</i> 3 × 8
03	PLANK TO PUSH-UP <i>8 each side</i> 3 × 8 ea
04	HANGING / BAR HOLD <i>20s hangs</i> 3 × 20s
05	SIDE PLANK WITH REACH <i>8 each, controlled</i> 2 × 8 ea
~ 40 MIN60S REST BETWEEN SETS	

DAY C	PEAK SPEED
01	RESISTED → FREE SPRINT <i>6 sets, max effort</i> 6 × 10m
02	MULTI-DIRECTION BOUND <i>6 each direction</i> 3 × 6 ea
03	HEIDEN (max lateral) <i>6 reps, stick landings</i> 6 reps
04	MIRROR SPRINT GAME <i>30s rounds</i> 4 × 30s
05	JUMP ROPE — SPEED <i>90s peak speed</i> 3 × 90s
~ 40 MINFULL REST BETWEEN SPRINTS	

DAY D	PEAK INTEGRATION
01	COMBINE CIRCUIT <i>3 full rounds</i> 3 rounds
02	DB COMPLEX <i>3 rounds, full chain</i> 3 rounds
03	SPEED LADDER EQUIV <i>4 rounds, fast feet</i> 4 rounds
04	HOLLOW HOLD <i>55s peak</i> 3 × 55s
05	FREE PLAY / GAME <i>peak fun</i> 12 min
~ 45 MINHAVE FUN ON DAY D	

— DELOAD. THEN THE COMBINE.

WEEK 12

12 / 12
PEAK

Lighter volume on purpose. We sharpen, we don't fatigue. The combine is at the end of this week — you want to arrive fresh.

DAY A		DELOAD LOWER
01	SQUAT TO TUCK JUMP <i>4 reps only, max intent</i>	3 × 4
02	DB BULGARIAN SPLIT SQUAT <i>5 each, light DBs</i>	2 × 5 ea
03	BROAD JUMP <i>4 jumps, prep for test</i>	4 reps
04	SL GLUTE BRIDGE (band) <i>8 each, light</i>	2 × 8 ea
05	DEAD BUG (no weight) <i>6 each, easy</i>	2 × 6 ea
~ 30 MIN		SHARP, NOT TIRED

DAY B		DELOAD UPPER
01	PUSH-UP (regular) <i>8 reps clean, 2 sets</i>	2 × 8
02	DB THRUSTER <i>5 reps light</i>	2 × 5
03	BAND PULL-APART <i>10 reps slow</i>	2 × 10
04	PLANK <i>30s, sharp form</i>	2 × 30s
05	HANGING / BAR HOLD <i>15s, easy</i>	2 × 15s
~ 28 MIN		SHARP, NOT TIRED

DAY C		SPEED PRIMER
01	FALLING START SPRINT <i>4 sprints, full rest</i>	4 × 10m
02	LATERAL BOUND <i>3 each, light</i>	2 × 3 ea
03	POGO HOPS <i>15 reps, stiff</i>	2 × 15
04	JUMP ROPE — STEADY <i>45s clean rhythm</i>	2 × 45s
05	MIRROR / FREE PLAY <i>just have fun</i>	5 min
~ 25 MIN		SHARP, NOT TIRED

DAY D		THE COMBINE
01	FULL WARM-UP × 2 <i>prepare to test</i>	10 min
02	THE 6 TESTS <i>see next page</i>	~45 min
03	FULL COOL-DOWN <i>recover, you earned it.</i>	5 min
04	WRITE THE NUMBERS <i>in the scorecard</i>	5 min
05	CELEBRATE <i>12 weeks, done.</i>	∞
THE TEST DAY		FULL EFFORT — ONE TIME ONLY

THE *combine.*

Twelve weeks of work. Forty-eight sessions. Three phase tests. Now we do the real one. Same six tests as Day Zero. Full warm-up twice. Full rest between every test. Give every test your maximum. Then we compare — across the entire twelve weeks. This is the proof.

01 BROAD JUMP — MAX

3 attempts, best counts. Measure heel-to-line.

02 30-SEC SHUTTLE

20m markers. 30s continuous touches. Count line touches.

03 PUSH-UPS / 60 SEC

Max quality push-ups. Note the version.

04 PLANK HOLD — MAX

Forearm plank, strict form. Time stops on break.

05 SL BALANCE — EYES CLOSED

Both legs. Hands on hips. Time to foot down.

06 DEEP SQUAT HOLD

Deepest, heels flat. Time stops when heels lift.

FINAL COMBINE

WEEK 12 — FINAL RESULTS

TEST	RESULT	NOTES
BROAD JUMP	___ cm / ___ in	___
SHUTTLE TOUCHES (30S)	___	___
PUSH-UPS (60S)	___	Knees / Toes
PLANK HOLD	___ : ___	___
BALANCE L / R	___ s / ___ s	___
DEEP SQUAT HOLD	___ : ___	___

YOU VS *you.*

Day Zero vs Week 12. The same kid. Twelve weeks apart. This is what showing up four times a week, for twelve weeks, does. Fill it in. Take a picture. Send it to whoever helped you stick with it.

PRE VS POST – THE 12-WEEK SCORECARD

DAY ZERO → WEEK 12

TEST	DAY ZERO	WEEK 12	CHANGE	% GAIN
BROAD JUMP	___ cm	___ cm	+ ___	+ ___%
SHUTTLE TOUCHES	___	___	+ ___	+ ___%
PUSH-UPS (60S)	___	___	+ ___	+ ___%
PLANK HOLD	___	___	+ ___	+ ___%
BALANCE L / R	___ / ___	___ / ___	+ ___	+ ___%
DEEP SQUAT HOLD	___	___	+ ___	+ ___%

— WHAT THIS MEANS

A 10% gain in broad jump is significant. A 25% gain in push-ups is huge. Whatever your numbers, they're *yours* — earned with four sessions a week for twelve weeks. You did this. Nobody did it for you. Now stack another twelve weeks on top.

YOU GROW WHEN YOU *recover*.

Training is the stress. Recovery is where the growth happens. Three pillars matter more than anything else: sleep, fuel, hydration. Get those three right and the program works even better. Get one of them wrong and the program gets harder than it has to be.

SLEEP

9-11

— HOURS / NIGHT

At your age, sleep is when your body builds the muscle, neural connections, and bone density that training stimulated during the day. Less sleep = less benefit from training.

- + Same bedtime every night, even weekends
- + No screens for 30 minutes before bed
- + Cool room, dark room, quiet room
- + Sunlight in your eyes within an hour of waking

FUEL

3+1

— MEALS + POST-TRAIN SNACK

Three real meals a day plus a snack within 60 minutes of finishing a session. The post-training snack is where recovery starts — your body is most ready to use what you eat then.

- + Protein at every meal (eggs, chicken, beef, dairy)
- + Carbs around training (rice, pasta, bread, fruit)
- + Vegetables at lunch and dinner
- + Cut the soda, juice, and energy drinks

WATER

2L+

— PER DAY, MORE IF HOT

Dehydration drops performance fast — even a 2% drop in hydration drops jump height, sprint speed, and reaction time. Drink before you're thirsty.

- + 500ml of water first thing in the morning
- + Sip water during every training session
- + Pee should be pale yellow, not dark
- + Add electrolytes if training in heat

EAT TO *train.* EAT TO GROW.

You don't need a fancy diet. You need real food, three times a day, in roughly the right amounts. The Plate Method works for every meal of the next twelve weeks — and the next twelve years.

¼ PLATE PRO

— PROTEIN. EVERY MEAL.

A palm-sized portion of protein at every meal. Protein is what your body uses to build muscle and recover from training. Skip it and recovery slows down a lot.

- + Chicken, beef, fish, eggs, turkey
- + Greek yogurt, cottage cheese, milk
- + Beans, lentils, tofu if plant-based
- + About the size of your palm per meal

¼ PLATE CARB

— ENERGY. TRAIN + GROW.

A fist-sized portion of carbs at every meal. Carbs are your fuel — your brain and muscles run on them. Kids who cut carbs train tired and recover slow.

- + Rice, pasta, bread, potato, oats
- + Fruit (bananas, apples, berries)
- + More carbs on training days
- + Whole grain > white when possible

½ PLATE VEG

— COLOR. EVERY MEAL.

Half your plate should be vegetables — preferably multiple colors. Vegetables give you the vitamins, minerals, and fiber your body needs to actually use the protein and carbs you eat.

- + Salad, broccoli, carrots, peppers
- + Spinach, tomato, cucumber
- + Mix colors — different colors = different vitamins
- + Frozen is just as good as fresh

— THE POST-TRAINING SNACK

Within 60 minutes of finishing any session: protein + carb. Greek yogurt with fruit. A glass of chocolate milk. A bowl of cereal with milk. A turkey sandwich. Nothing fancy — just real food, soon after training.

THE *rules.*

Talent is real. So is luck. But the kid who shows up four times a week for twelve weeks straight, who pays attention to detail, who treats every rep like it matters — that kid passes the more talented kid eventually. Every time.

These aren't motivational quotes. These are the mental rules every player I've coached at any serious level lives by. Pick the ones that matter to you. Tape them somewhere you'll see them every day.

01

SHOW UP ANYWAY

The hardest sessions are the ones you don't want to do. Those are the ones that count most.

02

TRUST THE PROCESS

Some weeks you'll feel worse than the week before. The numbers at the next test will tell the real story.

03

DETAIL OBSESSED

A good rep done 48 times beats a sloppy rep done 480 times. Quality is what separates kids in the long run.

04

COMPETE WITH YESTERDAY

Don't compare to the kid on Instagram. Compare to the version of yourself from one phase ago.

05

FALL IN LOVE WITH THE WORK

The kids who go furthest aren't the ones who love the games most. They're the ones who love the practice.

"The kids who keep their numbers in a notebook and show up four times a week for twelve weeks are the kids who become real hockey players."

— FROM THE COACH

COACH DAVID CIBOCH

M.ED. SPORT SCIENCE / STRENGTH &
CONDITIONING / HOCKEY

I'm a sport science coach who has spent the last decade working with hockey players — from first-time skaters all the way up to international competition. I also work full-time as a Physical Education and Sport Science teacher.

I built Elite Hockey Drills because the off-ice training world is full of generic, copy-paste programs that don't respect the sport or the player. Hockey is specific. Training should be specific too.

What you just spent twelve weeks doing is real work — the same principles I use with the players I coach in person. If you took it seriously, you're already ahead of most kids your age. Keep going. Move well. Train smart. Have fun with it.

— Coach David

"The kids who train smart at 12 become the players everyone watches at 18."
