ELITE HOCKEY DRILLS

FREE OFF-ICE PROGRAM · AGES 15–18

WEEK ONE

Four sessions the Elite Hockey Drills app wrote for a 16-year-old with practice on Tuesday and a game on Saturday. No equipment.

4 SESSIONS | 22–46 MIN | NO EQUIPMENT | GAME SAT

COACH DAVID CIBOCH

M.Ed. Sport Science · Former UAE National Team Coach · Week 1 of the Elite Hockey Drills app program · v2 · November 2026

WEEK 1 OF THE SEASON

THE WEEK THE APP BUILT.

Not a sample. The real first week of the Elite Hockey Drills program, as the app writes it for this profile:

PLAYER	a 16-year-old, recreational player, beginner level
SEASON	In season · game on Saturday · practice Tue
CAN TRAIN	Mon, Wed, Thu, Fri · about 45 min
EQUIPMENT	None (a backpack with books counts)

Different age, days, equipment or game night? The app rebuilds the week in a minute. This one fits everyone close to this profile.

THE WEEK

MON	**Athletic Lower Body** STRENGTH — LEGS	46 min
TUE	**Rest Day**	
WED	**Athletic Upper Body** STRENGTH — UPPER	30 min
THU	**Hockey Power + Conditioning** SPEED & AGILITY	39 min
FRI	**Pre-Game Activation**	22 min
SAT	**Game Day**	
SUN	**Rest Day**	

- Hard sessions sit at least 48 hours before the game. The activation day is the day before.
- Tired, sore or sick? Skip the session. Nothing is lost.
- Parents: sneakers, a few metres of floor or grass, a phone to film. Jumps on grass or a gym floor, not tiles.

BEFORE DAY 1 · 10 MINUTES

SCORE YOURSELF FIRST.

Three tests, a phone and a tape measure. The same three the app tracks, so week 4 can show what changed. Warm up first (Day 1's warm-up is perfect).

1 BROAD JUMP

Toes behind a line. Swing the arms, jump as far as you can, stick the landing on two feet. Measure from the line to the back of the nearest heel. Best of 3.

2 10 M SPRINT

Mark 10 metres. Start with one hand on the ground. A partner starts the stopwatch on the first movement and stops it when the chest crosses the line. Best of 3, full rest.

3 5-10-5 SHUTTLE

Three markers 4.6 m apart. Start at the middle, hand down. Sprint 5 to the right and touch the line, 10 to the left and touch, 5 back through the middle. Best of 3.

Why these three. Broad jump is the push-off, the sprint is the first three strides, the shuttle is a stop and a change of direction. Every shift uses all three.

THE SCORECARD

WHERE A PLAYER STANDS.

Find the row for the age and read across. Anything left of "Average" is where the biggest gains are waiting.

AGE 13-15

	AVERAGE	STRONG	ELITE
Broad jump boys	≥ 152 cm	≥ 183 cm	≥ 213 cm
Broad jump girls	≥ 127 cm	≥ 152 cm	≥ 183 cm
10 m sprint boys	≤ 2.30 s	≤ 2.10 s	≤ 1.95 s
10 m sprint girls	≤ 2.45 s	≤ 2.25 s	≤ 2.10 s
5-10-5 shuttle boys	≤ 5.20 s	≤ 4.90 s	≤ 4.60 s
5-10-5 shuttle girls	≤ 5.50 s	≤ 5.20 s	≤ 4.90 s

AGE 16-17

	AVERAGE	STRONG	ELITE
Broad jump boys	≥ 183 cm	≥ 213 cm	≥ 244 cm
Broad jump girls	≥ 152 cm	≥ 183 cm	≥ 213 cm
10 m sprint boys	≤ 2.15 s	≤ 1.95 s	≤ 1.80 s
10 m sprint girls	≤ 2.30 s	≤ 2.10 s	≤ 1.95 s
5-10-5 shuttle boys	≤ 4.90 s	≤ 4.60 s	≤ 4.40 s
5-10-5 shuttle girls	≤ 5.20 s	≤ 4.90 s	≤ 4.70 s

Week 1: jump _____ cm sprint _____ s shuttle _____ s

Week 4: jump _____ cm sprint _____ s shuttle _____ s

General-population norms the app uses (Topend Sports, FITNESSGRAM, Cartwright, NSCA; the app has a second, harder table for competitive players). In the app, log the three numbers under Testing on the Home screen; the week-4 retest shows the change.

DAY 1 · MONDAY · 46 MIN

ATHLETIC LOWER BODY

STRENGTH — LEGS | 8 EXERCISES

Slow on the way down, drive up. Leave two or three reps in the tank on every set.

WARM-UP

Light Jog / Dynamic Movement	2 min — easy, conversational pace
World's Greatest Stretch ▸	5 reps each side — slow, hold 2s at top
Glute Bridge ▸	12 reps

ANKLE PREP

SPRING ANKLE HOLD

▶ Demo

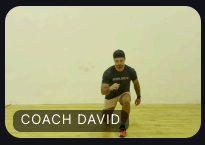

30 sec hold · 45 s rest

ANKLE PREP · A1 ISOMETRIC STABILITY

1. Rise onto the balls of both feet.
2. Hold for 30 seconds.

On the ice: Isometric tendon loading at the ankle — builds Achilles stiffness and tolerance.

ANKLE PREP

LUNGE POSITION DEPTH DROP

▶ Demo

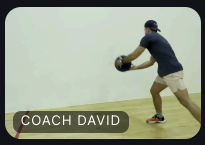

6 reps each side — 3s lower, full range · 60 s rest

ANKLE PREP · A2 ECCENTRIC CONTROL

1. Step into a lunge.
2. Lower your front knee forward over your toe — as far as ankle allows without heel lift.

On the ice: Eccentric ankle loading in a split stance mirrors the dorsiflexion demand of the...

BLOCK A · POWER

A ROTATIONAL THROW (BACKPACK OR BALL)

▶ Demo

3 × 8 each side · 45 s rest

PLANE BALANCE · hockey is played in all 3 planes; trains the plane this session was missing.

1. Stand sideways to a sturdy wall, 1-2 m away.
2. Hold a backpack (~2-3 kg) or basketball at your back hip.

On the ice: Trains the hip-to-hand rotational chain that drives every shot.

BLOCK B · STRENGTH

B BODYWEIGHT SQUAT

▶ Demo

2 × 10-12 reps · tempo 2-1-X · 75 s rest

STRENGTH · drive into the ground

1. Stand with feet shoulder-width, toes slightly turned out (5-15°).
2. Initiate by pushing the hips BACK — like sitting into a chair behind you.

On the ice: The foundational lower-body pattern — every powerful skating stride starts here.

BLOCK C · STRENGTH

C SINGLE-LEG GLUTE BRIDGE

▶ Demo

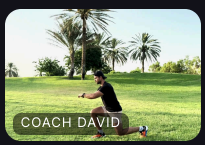

2 × 10-12 each leg · tempo 2-1-X · 75 s rest

HINGE · posterior chain (skating engine)

1. Lie on your back, one knee bent with foot flat, the other leg extended straight.
2. Squeeze the glute of the bent-knee leg before moving.

On the ice: Unilateral glute strength — corrects side-to-side imbalances

BLOCK D · STRENGTH

D SPLIT SQUAT

▶ Demo

2 × 10 each leg · tempo 2-1-X · 60 s rest

UNILATERAL · balance + COD strength

1. Step one foot forward into a long lunge stance. Both feet remain on the floor.
2. Hold dumbbells at sides or bar on the back.

On the ice: Fundamental single-leg strength — great beginner alternative to Bulgarian

BLOCK E · CORE

E DEAD BUG

▶ Demo

10 reps · tempo 2-1-X · 45 s rest

ANTI-ROTATION CORE · sport trunk stiffness

1. Lie on your back, arms pointing straight up toward the ceiling, knees bent at 90° in the air.
2. Press your lower back FLAT into the floor — eliminate all space between spine and ground.

On the ice: Anti-extension core control — teaches the stability needed at high speeds

BLOCK F · CORE

F SIDE PLANK

▶ Demo

3 × 20-30 sec each side · 45 s rest

PLANE BALANCE · hockey is played in all 3 planes; trains the plane this session was missing.

1. Lie on your side, forearm on the floor, elbow under the shoulder.
2. Stack the feet or stagger them for more stability.

On the ice: Lateral stability — prevents core breakdown during crossovers and tight turns

COOL-DOWN

Figure-4 Stretch ▸	45-60 sec each side
Kneeling Hip Flexor Stretch ▸	45-60 sec each side

DAY 2 · WEDNESDAY · 30 MIN

ATHLETIC UPPER BODY

STRENGTH — UPPER | 6 EXERCISES

Slow on the way down, drive up. Leave two or three reps in the tank on every set.

WARM-UP

Light Jog / Dynamic Movement	2 min — easy, conversational pace
Cat-Cow ▸	10 reps — slow and controlled
Shoulder Y-T-W ▸	10 reps
Wall Slide ▸	10 reps
World's Greatest Stretch ▸	8 each side — slow, flowing

BLOCK A · STRENGTH

A PUSH-UP

▶ Demo

2 × 10-12 reps · tempo 2-1-X · 75 s rest

PUSH · bilateral strength

1. Start in a high plank — hands slightly wider than shoulder-width.
2. Body is perfectly rigid — head to heel in a straight line.

On the ice: Builds pressing strength and core stability simultaneously

BLOCK B · STRENGTH

B INVERTED ROW

▶ Demo

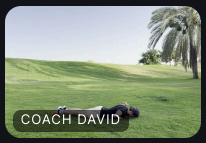

2 × 10-12 reps · tempo 2-1-X · 75 s rest

PULL · bilateral horizontal pull

1. Set up a bar or sturdy table at hip height.
2. Lie underneath, grab the bar with hands shoulder-width or slightly wider, palms facing away.

On the ice: Bodyweight horizontal pull — builds the upper-back strength that protects shoulders…

BLOCK C · STRENGTH

C REVERSE SNOW ANGEL

▶ Demo

12-15 reps · tempo 2-0-1 · 30 s rest

POSTERIOR SHOULDER · face pull / band (1:2 ratio)

1. Lie face down on the floor, forehead lightly resting on a towel.
2. Arms straight at your sides, palms down.

On the ice: Bodyweight posterior shoulder work — builds the upper-back endurance that counteracts…

BLOCK D · CORE

D DEAD BUG

▶ Demo

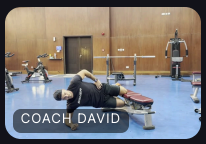

20-30 sec hold · 45 s rest

ISOMETRIC · push/plank hold

1. Lie on your back, arms pointing straight up toward the ceiling, knees bent at 90° in the air.
2. Press your lower back FLAT into the floor — eliminate all space between spine and ground.

On the ice: Anti-extension core control — teaches the stability needed at high speeds

BLOCK E · PREHAB

E COPENHAGEN ADDUCTION (KNEE-BENT)

▶ Demo

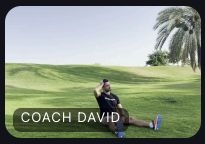

15-20 sec each leg · 40 s rest

ADDUCTOR · Copenhagen (Hölmich protocol)

1. Lie on your side on the floor, top foot or shin resting on a low couch or bed.
2. Knee BENT (not straight — that's the regression).

On the ice: Builds the inner-thigh strength that protects against groin strain — the most common…

BLOCK F · PREHAB

F NECK ISOMETRIC — LATERAL

▶ Demo

15-20 sec hold each side · 30 s rest

NECK · contact tolerance

1. Sit or stand tall. Place one hand against the side of the head above the ear.
2. Press the head sideways into the hand — maximum isometric force.

On the ice: Lateral neck strength prevents the rotational concussion mechanism — most hockey...

COOL-DOWN

Overhead Tricep Stretch ▸	45-60 sec each side
Doorway Chest Stretch	45-60 sec each side

DAY 3 · THURSDAY · 39 MIN

HOCKEY POWER + CONDITIONING

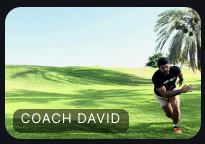

SPEED & AGILITY | 5 EXERCISES

Fast and fresh. Full rest between efforts. When a rep gets slow, that set is over.

WARM-UP

Light Jog / Dynamic Movement	2 min — easy, conversational pace
Scorpion Stretch ▸	6 reps each side — move through the range
Jumping Jacks ▸	30 sec
A-Skip ▸	20 m — easy, not max effort
World's Greatest Stretch ▸	8 each side — slow, flowing

BLOCK A · POWER

A LATERAL BOUND TO STICK

▶ Demo

4 each side · 60 s rest

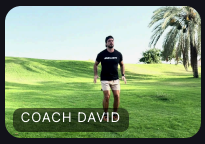

LATERAL PLYO · skating push

1. Start standing on one leg.
2. Push off sideways and land on the OTHER leg — short bound, only 30-40 cm.

On the ice: Youth regression of the standard lateral bound — shorter distance, longer landing pause.

Stick the landing 1 sec · soft knees · STOP if knee collapses inward

BLOCK B · POWER

B ANKLE HOPS

▶ Demo

12 reps · 60 s rest

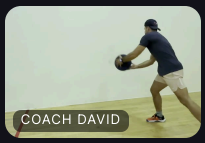

LINEAR ACCEL · first-step speed

1. Stand with feet hip-width, arms relaxed at sides.
2. Push off the ground using ONLY your ankles — minimal knee bend. Think pogo stick.

On the ice: Builds calf and ankle stiffness for faster skating push-off

Stick the landing 1 sec · soft knees · STOP if knee collapses inward

BLOCK C · POWER

C ROTATIONAL THROW (BACKPACK OR BALL)

▶ Demo

3 × 8 each side · 45 s rest

PLANE BALANCE · hockey is played in all 3 planes; trains the plane this session was missing.

1. Stand sideways to a sturdy wall, 1-2 m away.
2. Hold a backpack (~2-3 kg) or basketball at your back hip.

On the ice: Trains the hip-to-hand rotational chain that drives every shot.

BLOCK D · CORE

D DEAD BUG

▶ Demo

10 reps · tempo 2-1-X · 30 s rest

ANTI-ROTATION CORE

1. Lie on your back, arms pointing straight up toward the ceiling, knees bent at 90° in the air.
2. Press your lower back FLAT into the floor — eliminate all space between spine and ground.

On the ice: Anti-extension core control — teaches the stability needed at high speeds

BLOCK E · AEROBIC

E BRISK WALK (ZONE 2)

15 min

AEROBIC BASE · conversational pace, 60-70% max HR. Build the cardiac engine that supports everything else.

1. Brisk pace — fast enough that you are breathing through the nose with intent but still able to hold a conversation in full sentences.
2. Target 60-70% max heart rate.

On the ice: The cheapest, most-evidence-backed longevity intervention available.

COOL-DOWN

Seated Hamstring Stretch ▸	45-60 sec
Kneeling Hip Flexor Stretch ▸	45-60 sec each side

DAY 4 · FRIDAY · 22 MIN

PRE-GAME ACTIVATION

1 EXERCISES

The day before the game. Nothing here should tire you. Wake the legs up, then stop.

WARM-UP

Light Jog / Dynamic Movement	3-4 min — easy, conversational pace (~120 BPM)
Groin Adductor Slide ▸	6 reps each side — move THROUGH the range, do NOT hold
Ankle Dorsiflexion Drill ▸	6 reps each side — move THROUGH the range, do NOT hold
Glute Bridge ▸	2 × 10 reps

MAIN

10M ACCELERATION SPRINT

▶ Demo

3 × 10 m — explosive start, 80% effort · 90 s rest

1. Set two cones 10m apart. Start in a 3-point or 2-point athletic stance.
2. Lean forward aggressively — your body angle should feel like you're falling.

On the ice: Mimics the explosive 10m bursts used constantly in hockey shifts

COOL-DOWN

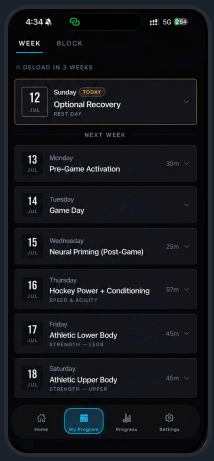

Diaphragmatic Breathing	3 min — 4s in, 4s hold, 4s out, 4s hold
Figure-4 Stretch ▸	20-30 sec each side — relaxed, NOT intense
Butterfly Stretch ▸	20-30 sec — relaxed, NOT intense

WHAT HAPPENS NEXT

WEEK 2 IS ALREADY WRITTEN.

This PDF is week 1 of 52. The app has the rest, built the same way, for you:

- **Week 2 — Same plan: progress when it feels easy. Week 3 — Same plan: progress when it feels easy. Week 4 — Same plan: progress when it feels easy.** Then the retest.
- Every 4 weeks a new block with new exercises, so nothing goes stale.
- Sessions move around your games: hard days 48 hours out, activation the day before.
- A demo video and a coach's note for every exercise. Sets, rest and the timer on the phone.
- The three tests tracked, with the norms you just read.

THE ELITE HOCKEY DRILLS APP

Tell it your age, level, position, days and equipment. It writes the season.

Start the free week →

7 days free on the annual plan, then $99.90/year. Monthly $17.99, no free week. Cancel anytime. iOS and Android.

Parents: the trial starts from your App Store or Google Play account, so you stay in control of any subscription.

Prefer a one-time program? The 8-week programs on elitehockeydrills.com are $79 once, with a 30-day money-back guarantee.

Questions? Reply to the email this program came with. I read every one. — Coach David
